EXTRACTIONS

An estimated **20 million teeth** are extracted every year – making extractions one of the most common dental procedures.^{1,2}

DRY SOCKETS

Up to 38% of third molar extractions can result in a dry socket, and approximately up to 5% of all extractions result in dry sockets.³ Dry sockets can cause the patient considerable pain and prolong the healing process.

DRY SOCKET PREVENTION

"Sockit" Gel actively **prevents dry sockets** by maintaining a healthy environment for the extraction site while providing immediate pain relief and antimicrobial defense.

ANESTHETICS

Premium Dental Needles—Plastic Hub

Double-silicone coating reduces pain and tissue trauma. Thinner needle wall increases flexibility. Features a softer and less aggressive hub and sheath. Rounded hub provides gentler contact against cheek and gum. No ribs on hub where blood can coagulate. Shorter butt end and larger bore for easier aspiration. Indicating mark on hub for simple identification of triple-bevel position. Round cutting edge protects gum. Seals and hubs are color coded. Plastic hub screws on both metric and imperial syringes. Sterilized.

Vanish™ 5% Sodium Fluoride White Varnish with Tri-Calcium Phosphate SOLVENTUM, FORMERLY 3M HEALTH CARE

White varnish, enhanced with tricalcium phosphate, becomes virtually invisible after application. Saliva-activated formula adheres to dry or moist teeth and will spread after application due to the patented formula, which allows migration to tooth surfaces. Indicated to treat hypersensitive teeth, exposed dentin, and root-surface sensitivity.

- Helps reduce material memory as the suture is released from the track
- Features 2 needle parks to accommodate a wide range of needle types and sizes and protect needles from damage

Silicone-coated 300-series stainless-steel needles:

- Provide finer point geometry for superior penetration
- Are precise and strong enough to resist bending, yet ductile enough to resist breaking

TOPICAL SKIN ADHESIVE — OCTYL

High-Strength 2-Octyl Cyanacrylate Formulation

Advantages

Rapid set time

Flexibility without a plasticizer

Ergonomic ampule designed for ease of handling and targeted application

Provides an effective microbial barrier and water-resistant protection

High tensile strength

Unique formulation will not solidify in ampule, allowing all 0.5 mL to be used

Gravity fed applicator delivery system—no need to squeeze ampule

Glass-free reservoir containing 0.5 mL of Topical Skin Adhesive

Rigid sleeve helps prevent bending of applicator during adhesive application

Angled applicator tip changes color in the presence of adhesive

Perforation in the middle, allowing ease of adhesive flow

Additional Information

Polymerization starts when adhesive comes in contact with tissue or fluid.

All 0.5 mL of adhesive can be used on the patient, as adhesive will not solidify in the ampule.

Topical Skin Adhesive will remain attached to the skin surface until natural cellular regeneration occurs (approx. 5–7 days). If needed, any standard adhesive remover product may be used to release the adhesive from the skin. Peel off the film, do not pull the skin apart.

3M Medical Securement Solutions

Drive efficiency in your clinical practice and reduce tape SKUs.

A choice that's critical to care. At Solventum, formerly 3M Health Care, we've made it easy to choose the right securement for each patient and application, with four classes of securement that can work harder and smarter.

Non-adhesive

3M™ Coban™ NL Non-Latex Self-Adherent Wrap*

Non-adhesive securement for clinical applications such as blood draws, dressings, immobilization, securement for difficult to dress areas (head, fingers, toes) and support, and mild compression for soft tissue injuries (i.e. strains, sprains).*

Multi-purpose

3M™ Micropore™ S Surgical Tape*

Multi-purpose securement for clinical applications such as blood draws, light-weight dressings, IV lines and tubing (secondary securement), and non-critical tubes.

Flexible

3M™ Medipore™ H Soft Cloth Surgical Tape

Flexible securement for clinical application such as dressing and added pressure, IV lines and tubing (secondary securement), when swelling or movement is anticipated, central venous catheters (secondary securement), chest tubes, and surgical drain tubes.

High-adhesion

3M™ Durapore™ Surgical Tape

High-strength securement for clinical applications such as urinary catheters, nasogastric tubes, orogastric tubes, and patient positioning.

Contact your Henry Schein representative or visit [3M.com/MedicalSecurement](https://www.3m.com/MedicalSecurement) to learn more.

*Skin performance: Designates products that deliver the securement power you need while minimizing damage to skin.

*May use as a component in a compression wrap system support only under supervision of a wound care specialist.

Ritter 225 Barrier-Free® Examination Chair

MIDMARK

The number of elderly and obese in the U.S. is steadily growing, and over one fifth of adults in America are disabled. Assisting patients with mobility limitations onto exam chairs has become a frequently performed task. Although caregivers working in health-care facilities are in one of the most at-risk professions for musculoskeletal disorders, little has been done to evaluate and reduce risk. The Ritter 225 is designed to offer low and high positioning heights so you can provide the best care to all patients, whether treating the elderly, expectant mothers, or patients with disabilities.

Triage® System

Lab quality results at point-of-care speed. With its comprehensive menu, the Triage system is an easy-to-use system that provides the reliable diagnostic answers you need to make rapid, cost-effective treatment decisions at the point of care.

Easy to use for fast results

Runs whole blood, plasma or urine samples to generate quick results in 15-20 minutes. Patient sample testing is a simple three-step procedure with user-friendly test cartridges that are easy to manage.

Accurate lab quality results

Test cartridges utilize advanced microfluidics and internal controls for providing consistent accurate results. Its diverse immunoassay menu delivers reliable diagnostic answers for quantitative troponin I, CK-MB, myoglobin, BNP, NT-proBNP, d-dimer and qualitative TOX drug screen.

Learn more about the Triage system by scanning the QR code, visiting quidelortho.com, calling us at **800.874.1517** or reaching out to your Henry Schein representative.

POINT-OF-CARE TESTING

HemoScreen™ Analyzer PIXCELL

The HemoScreen Analyzer offers a true point-of-care solution for the world's most common blood test—the complete blood count (CBC). It is a portable, automated hematology instrument used for the quantitative determination of CBC parameters, including 5-part leukocyte differential. Making blood testing exceptionally simple, HemoScreen uses a disposable cartridge that includes all necessary reagents and requires no maintenance or calibration.

- CBC testing requires only 40 µl of venous or capillary blood and provides results within 5 minutes
- Measures 20 standard CBC parameters with the accuracy and precision of the most advanced central lab analyzers
- For *in vitro* diagnostic use only
- The only CBC with 5-part differential that is FDA-cleared for point-of-care use
- Sample type: whole blood only
- HemoScreen purchase requires initial order of 100 CBC Test Kits (2 boxes)

HemoScreen™ CBC Test Kit PIXCELL

- A self-contained disposable unit in which a single blood sample is prepared for CBC analysis
- Includes 2 components: a sampler and a cartridge
- The disposable sampler has 2 capillaries used to collect a 40-µl blood sample (capillary or venous.) It is then inserted into the disposable reagent cartridge, and the prepared Test Kit is ready for HemoScreen analysis
- The CBC with 5-part diff test begins; results in 5 minutes
- The CBC Test Kit is a required accessory to the HemoScreen Analyzer. One box includes 50 disposable Test Kits (cartridge and sampler)

#BC-FA-00400
(145-9573)..... 50 per Box

HemoScreen™ Printer PIXCELL

- Optional direct thermal printer
- HemoScreen-compatible external USB printer can be used to print test results
- Test results are saved in system archives and are electronically transferable

By participation in such program, you agree that, to your knowledge, your practice complies with the program requirements. For HS promotions: This promotion offers a bundled discount. The cost of any "buy/get" (or "no charge") items is a discount applied to your other purchases on the same invoice. The reportable value (unit price) of the "no charge" item will be identified on the invoice. To calculate the applicable discount on the other items on the same invoice, divide the total value (unit price(s)) of any no-charge item(s) by the total value (extension price(s)) of all other items purchased on the same invoice, and apply the resulting percentage equally to each item to determine net prices. For manufacturer promotions: The prices stated in the invoice or statement may reflect a discount or be subject to a rebate. You must fully and accurately report this stated discount price, or if applicable, any net pricing, after giving effect to any rebates, to Medicare, Medicaid, Tricare and any other federal or state program upon request by any such program. Accordingly, you should retain these records. It is your responsibility to review any agreements or other documents applicable to these prices to determine if they are subject to a rebate.
