Diabetes and the health of your mouth:

a two-way relationship

Almost 1 in 4 people living with **diabetes have gum disease**, making it more likely they have trouble managing their blood sugar.

Gum infections make it harder to control your patient's blood sugar, increasing their risk of heart disease, kidney disease, and vision loss. High blood sugar makes gum disease worse and harder to treat.

Let's educate patients together.

Prevention Is Power helps health care professionals link oral health to overall health, empowering patients to take charge of their wellness.

BD Veritor™ Plus System BD

The wireless BD Veritor™ Plus System provides health-care providers and laboratorians in physician offices, clinics, hospitals, and integrated delivery networks (IDNs) with objective, lab-quality immunoassay test results within minutes. This fast and accurate solution streamlines the point-of-care (POC) diagnostic workflow and allows providers to quickly review patient results and determine the appropriate treatment in a single consultation. The new system can help detect infectious diseases such as influenza A and B, respiratory syncytial virus (RSV), and group A strep while the patient is still on site, which can enable faster decision-making for an earlier intervention opportunity.

- Faster access to test results: Help inform appropriate and targeted treatment decisions
- Improved workflow: The BD Veritor™ Plus Analyzer improves workflow with an Analyze Now or Walk Away mode, providing test results (with a print-enabled function) and aiding in decision-making while the patient is on site
- Improved traceability: The BD Veritor™ InfoScan module can scan 3 different identifiers (operator ID, specimen ID, and test kit/lot) that can be locally recorded, printed, or downloaded, and reduces hands-on time through automated documentation
- Modularity: Provides a unique solution to meet each testing site's preference
- Connectivity: BD Veritor™ InfoSync module provides the same benefits as BD Veritor™ InfoScan. Connects and documents test results across multiple sites and can integrate with a hospital electronic medical record or laboratory information system
- Advanced particle technology: Enhances sensitivity by using a proprietary process to produce highly stable, modified colloidal metal particles
- Adaptive read technology: Compensates for background. Nonspecific binding helps improve specificity to reduce false-positive results

- Positive percent agreement (A/B): 82.1%/74.6
- Negative percent agreement (A/B): 98.6%/99.6%
- Positive agreement vs. PCR for current visual read rapid tests ranges from 10% to 70%
- Streamlined workflow: Provides a digital result in <11 minutes, with <50 seconds of hands-on time

POINT-OF-CARE TESTING

i-STAT® Handheld System ABBOTT

Real-time, lab-quality results in minutes—not hours. The i-STAT® Handheld is an advanced, easy-to-use blood analyzer that provides a wide range of tests using just 2 or 3 drops of blood.

- Speed: With components of a full-scale lab in each cartridge, results occur in minutes
- Accuracy: A unique combination of biosensors and calibrants deliver high-quality results
- Reliability: Single-use cartridges reduce many of the problems inherent in multi-use systems

Piccolo Xpress® Chemistry Analyzer

ABBOTT

The first broad-menu clinical chemistry analyzer designed for near-patient testing. *Basic Panel* contains BUN, Ca, Cl-, CRE, GLU, K+, Na+, and tCO₂.

Comprehensive Panel contains ALB, ALP, ALT, AST, BUN, Ca, Cl-, CRE, GLU, K+, Na+, TBIL, tCO₂, and TP. *Lipid Panel* contains CHOL, CHOL/HDL (calculated), HDL, LDL (calculated), TRIG, and VLDL (calculated).

- Speed: Add the sample, insert the reagent disc, and in approximately 12 minutes receive a report suitable for the patient file or transferred to a computer, printer, or LIS/EMR.
- Ease: A fully automated system requiring no special operating skills.
- Exclusivity: Offers the only CLIA-waived comprehensive metabolic panel (CMP) blood test on the market.
- Accuracy: Self-calibrates with each run. The onboard continuous intelligent Quality Control (iQCT) monitors the analyzer, reagent reactions, and sample to ensure chemistry and instrument integrity.

TOPICAL SKIN ADHESIVE – OCTYL

High-Strength 2-Octyl Cyanacrylate Formulation

Advantages

Rapid set time

Flexibility without a plasticizer

Ergonomic ampule designed for ease of handling and targeted application

Provides an effective microbial barrier and water-resistant protection

High tensile strength

Unique formulation will not solidify in ampule, allowing all .5 ml to be used

Gravity fed applicator delivery system - no need to squeeze ampule

Glass-free reservoir containing 0.5mL of Topical Skin Adhesive

Rigid sleeve helps prevent bending of applicator during adhesive application

Angled applicator tip changes color in the presence of adhesive

Perforation in the middle, allowing ease of adhesive flow

Additional Information

Polymerization starts when adhesive comes in contact with tissue or fluid.

All 0.5 ml of adhesive can be used on the patient, as adhesive will not solidify in the ampule.

Topical Skin Adhesive will remain attached to the skin surface until natural cellular regeneration occurs (approx. 5-7 days). If needed, any standard adhesive remover product may be used to release the adhesive from the skin. Peel off the film, do not pull the skin apart.

Getting to Know the Standard

Accessible equipment can make a crucial difference in patient outcomes and caregiver safety. Are your exam and procedure chairs compliant?

- 01 Seat Height:** 17" or lower and 25" or higher
- 02 Transfer Surface:** 21" wide and 17" deep
- 03 Base Clearance:** 26" wide or less
- 04 Transfer Supports:** <1 ½" from surface edge, capable of supporting transfer on each side, >15 ½" long, 6" - 18" high, 1 ¼" - 2" grip diameter, continuous gripping surface
- 05 Leg Supports:** Supports the patient's thigh, knee and calf

626 Barrier-Free® Examination Chair MIDMARK

Many health-care providers are not aware of current standards for proper blood-pressure measurement. If this isn't addressed, it leaves health systems at serious risk. 9.8% of the population is affected by overestimation of high blood-pressure errors. Multiply the cost of treatment for hypertension by the typical patient panel size and the cost of overtreatment could be as much as \$135,000 per each practicing physician. The impact of overmedication can also result in complications such as dizziness, fainting, exhaustion, or even patient falls. The Midmark 626 is the first exam chair of its kind designed to promote proper patient positioning for a more accurate blood-pressure measurement.

- Easily position patients for a better BP measurement
- Powered movement of the back section ensures the patient's back is supported
- A Barrier-Free® low chair-height allows the majority of patients, even female patients with heights in the 3rd percentile, to place their feet flat on the floor

Ritter 225 Barrier-Free® Examination Chair MIDMARK

The number of elderly and obese in the U.S. is steadily growing, and over one fifth of adults in America are disabled. Assisting patients with mobility limitations onto exam chairs has become a frequently performed task. Although caregivers working in health-care facilities are in one of the most at-risk professions for musculoskeletal disorders, little has been done to evaluate and reduce risk. The Ritter 225 is designed to offer low and high positioning heights so you can provide the best care to all patients, whether treating the elderly, expectant mothers, or patients with disabilities.

Medical tapes and wraps

Drive efficiency in your clinical practice and reduce tape SKUs

A choice that's critical to care. At Solventum, formerly 3M Health Care, we've made it easy to choose the right securement for each patient and application, with four classes of securement that can work harder and smarter.

Non-adhesive

3M™ Coban™ NL Non-Latex Self-Adherent Wrap*

Non-adhesive securement for clinical applications such as blood draws, dressings, immobilization, securement for difficult to dress areas (head, fingers, toes) and support and mild compression for soft tissue injuries (i.e. strains, sprains).*

Multi-purpose

3M™ Micropore™ S Surgical Tape*

Multi-purpose securement for clinical applications such as blood draws, light-weight dressings, IV lines and tubing (secondary securement) and non-critical tubes.

Flexible

3M™ Medipore™ H Soft Cloth Surgical Tape

Flexible securement for clinical application such as dressing and added pressure, IV lines and tubing (secondary securement), when swelling or movement is anticipated, central venous catheters (secondary securement), chest tubes and surgical drain tubes.

High-adhesion

3M™ Durapore™ Surgical Tape

High-strength securement for clinical applications such as urinary catheters, nasogastric tubes, orogastric tubes and patient positioning.

Sani-HP1™ Germicidal Wipes

PDI

One-step disinfectant powered by PDI's proprietary Hydroguard Technology™ to enhance material compatibility on hard, nonporous surfaces and sensitive health-care equipment. At a 1:1 dilution rate, its hydrogen peroxide formulation effectively breaks down dried blood and greasy soils, helping EVS teams maintain cleaner, safer surfaces with less effort. Provides one-minute contact time against bactericidal, fungicidal, tuberculocidal, and virucidal pathogens, including norovirus, *Candida auris*, multidrug-resistant organisms, and TB. Category-IV toxicity. Pleasant (minimal) scent. Ready to use: no mixing or measuring required. Bulk packaging features a dual-access lid for quick and easy dispensing of single or multiple wipes. Intermediate-level formula that is ideal for daily, everyday disinfection.

- Biodegradable active ingredient: hydrogen peroxide, which breaks down into water and oxygen
- Recyclable canisters: Both the bulk packaging and canisters feature high wipe counts, increasing the number of wipes per case and decreasing plastic waste

The Sandwich Technique

with Glass Ionomer/Glass Hybrid and Composite Resin

The sandwich of glass ionomer cement or glass hybrid and composite resin is an effective technique that optimally combines the desirable properties of the restorative materials.¹

- Reduced post-operative sensitivity
- Pulpal protection from irritation²
- Fluoride release over time³
- Prevention of demineralization
- Remineralization of affected dentin
- Rapid placement and curing of a single bulk layer

The Sandwich Technique can be used in extensive Class I, Class II, Class III, Class V and subgingival cavities that are difficult to isolate.

G-ænial™ A'CHORD

The advanced composite with unishade simplicity

- Achieves esthetics of 16 Classic VITA®† shades in just 5 shades
- Full-Coverage Silane Coating (FSC) and High-Performance Pulverized CERASMART® (HPC) fillers provide excellent physical and esthetic properties
- Truly universal material may be used in anterior or posterior, in restorations large or small, with no slumping
- Provides natural fluorescence and esthetics in ANY light
- Layering shades are available for more complex and challenging cases

G-ænial™ Universal Injectable

Universal Light-Cured Radiopaque Injectable Composite

- Injectable with total control - create anatomy as you inject with no slumping or stringing
- Superb handling with excellent adaptation to the cavity preparation, recommended for Class I, II, III, IV, and V restorations
- Strong and highly durable restorations, exhibiting outstanding flexural strength and wear-resistance
- Long-lasting esthetics - high gloss retention and resistance to discoloration

EQUIA Forte® HT

Cost-Effective Long Term Restorative Alternative

- Improved translucency and physical properties for esthetic, strong restorations
- Intelligent particle size distribution and interaction allowing superb handling characteristics
- Exceptional marginal seal for long-term resistance to microleakage
- High fluoride release at tooth-restorative interface
- Ideal restorative treatment for high-risk caries, pediatric and geriatric patients

By participation in such program, you agree that, to your knowledge, your practice complies with the program requirements. For HS promotions: This promotion offers a bundled discount. The cost of any "buy/get" (or "no charge") items is a discount applied to your other purchases on the same invoice. The reportable value (unit price) of the "no charge" item will be identified on the invoice. To calculate the applicable discount on the other items on the same invoice, divide the total value (unit price(s)) of any no-charge item(s) by the total value (extension price(s)) of all other items purchased on the same invoice, and apply the resulting percentage equally to each item to determine net prices. For manufacturer promotions: The prices stated in the invoice or statement may reflect a discount or be subject to a rebate. You must fully and accurately report this stated discount price, or if applicable, any net pricing, after giving effect to any rebates, to Medicare, Medicaid, Tricare and any other federal or state program upon request by any such program. Accordingly, you should retain these records. It is your responsibility to review any agreements or other documents applicable to these prices to determine if they are subject to a rebate.
