EQUIPMENT
PRODUCT GUIDE 2024
Fall/Winter Edition

Because So Many
Rely on You...
You Can
Rely on Us.

Discover the **Henry Schein Equipment Guide**, your trusted resource for top-of-the-line medical equipment to build the right foundation for your practice.

From cutting-edge diagnostic tools to essential exam room equipment, we provide everything you need for an efficient, well-equipped environment. Whether upgrading your facility or setting up a new office, our carefully selected offerings cover all aspects of healthcare equipment. Your patients and healthcare team will feel the difference.

Let us guide you with expert recommendations, trusted brands, and a commitment to exceptional service, ensuring your practice thrives and delivers outstanding patient care.

TABLE OF ■ **CONTENTS**:

midmark®
Ritter® 225 Barrier-Free® Examination Chair

The number of elderly and obese in the U.S. is steadily growing, and over one fifth of adults in America are disabled. Assisting patients with mobility limitations onto exam chairs has become a frequently performed task. Although caregivers working in health-care facilities are in one of the most at-risk professions for musculoskeletal disorders, little has been done to evaluate and reduce risk. The Ritter 225 is designed to offer low and high positioning heights so you can provide the best care to all patients, whether treating the elderly, expectant mothers, or patients with disabilities.

midmark®
626 Barrier-Free® Examination Chair

Many health care providers are not aware of current standards for proper blood-pressure measurement. If this isn't addressed, it leaves health systems at serious risk. 9.8% of the population is affected by overestimation of high blood-pressure errors. Multiply the cost of treatment for hypertension by the typical patient panel size and the cost of overtreatment could be as much as $135,000 per each practicing physician. The impact of overmedication can also result in complications such as dizziness, fainting, exhaustion, or even patient falls. The Midmark 626 is the first exam chair of its kind designed to promote proper patient positioning for a more accurate blood-pressure measurement.

• Easily position patients for a better BP measurement
• Powered movement of the back section ensures the patient's back is supported
• A Barrier-Free® low chair-height allows the majority of patients, even female patients with heights in the 3rd percentile, to place their feet flat on the floor

Versa Exam Table

The Versa exam table provides the ability to readily and cost-effectively adapt to changing needs. When it comes to care, the Standard model provides a new standard of quality and efficiency for most practices. Easily convert to a pediatric top to safely and effectively care for children from newborns to adolescents.

• Improves the patient experience with a stable platform to support patients of all builds, and supports patient self-positioning
• Easy to connect and a removable upholstery top is available in standard adult and pediatric sizes to meet the changing needs of a facility
• Customizable to choose the options that fit within a budget
• Includes an ergonomically designed pass-through side drawer purposefully positioned at waist height to reduce bending and twisting for caregivers, while providing a generous 3.7 cubic feet of storage space

seca 374 Digital Baby Scale

The seca 374 baby scale with extra-large weighing tray is perfect for babies and seated toddlers up to 44 lb. The adjustable damping function combined with the Auto-HOLD function ensures fast and precise weighing.

- Ergonomic tray with high side walls for increased safety
- Solid surfaces prevent liquid penetration, eliminating cross contamination
- Capacity: 44 lb
- Optional measuring rod (HS Item # 1165634) expands scale into a measuring station

(824-3615).. ea

Baby Bands Head Circumference Measuring Tape

Head circumference (front side) and symmetry of the face (reverse side) can both be measured with this measuring tape of nonstretch Teflon® synthetic material. A practical dispenser (contains 15 tapes) ensures that they are stored safely with no risk of damage.

- Measuring range: 2"–23" (5 cm–59 cm)
- Graduations: 1/16"/1 mm

Connex® Spot Monitor

Features an easy-to-use, vivid touch-screen display and provides accurate vital signs measurement, including blood-pressure averaging, spot checking, interval monitoring and custom scoring across patient populations. Device connects wirelessly to an EMR and accurately sends vitals to the patient chart from the point of care to help improve efficiency.

- Designed for the physician-office environment with an easy-to-use, vivid touch-screen display
- More accurate hypertension diagnosis without slowing down your workflow thanks to automated blood-pressure averaging
- Improved capabilities for assessing respiratory conditions such as COPD, asthma, and community-acquired pneumonia (CAP), thanks to integrated professional-grade pulse oximetry
- Increase staff efficiency and eliminate data-entry errors with wireless transfer of vital signs directly into an EMR

CP 150™ Electrocardiograph

Combines simplicity with speed using a unique touch-screen display and keyboard for improved accuracy. To meet the needs of fast-paced environments, take quick ECG readings with the touch of a button. And, with a range of advanced connectivity features, it will help improve your practice work flow by sending, managing, and sharing patient data with systems inside or outside your facility.

- 7" full-color touch-screen display for fast and easy entry of accurate patient information
- Instant-on feature powers the device up quickly
- Advanced filters for optimal ECG trace quality ensure accurate readings
- 3-lead ECG preview
- Optional adult and pediatric MEANS ECG interpretation software offers a second opinion
- Battery operation for portability
- Stores up to 100 test results on the device, which can be transferred to a USB flash drive

Welch Allyn Spot™ Vision Screener

A handheld, portable device designed to help users quickly and easily detect vision issues on patients from 6 months of age through adult. Spot screens both eyes at once from a nonthreatening 3-ft distance. The touch-screen display allows for one-touch activation, simple management of patient data entry, and easy configuration for both vision screening and autorefraction applications.
Features:
• Supports AAP screening guidelines for early detection of amblyopic risk factors
• Automated screening provides thorough, objective, and easy-to-understand results
• Easy to use, easy to implement, with minimal user training required
• Adequately powered for mass screening events
• Captures readings 97% of the time, helping to screen otherwise difficult patients
• Wireless printing and WiFi-enabled for easy export of data
• Manual exports available via USB port
• Uses lights and sounds to help engage children
• Convenient carrying case

AMERICAN DIAGNOSTIC CORPORATION

Advantage™ 6021N Automatic Digital Blood Pressure Monitor

This fully automatic upper-arm digital blood-pressure monitor is designed for home use. It measures systolic and diastolic pressure as well as pulse. Equipped with Smart Logic Modulation (SLM) technology, it ensures a gentle inflation process for optimal comfort and accuracy. The monitor features a self-adjusting, extended-range non-latex D-bar cuff that fits arms from 8.7" to 16.5".
Key features:
- Automatic inflation and deflation control
- Irregular heartbeat detector
- Stores the last 99 readings with date and time stamp for 2 users
- Automatic shut-off function
- Made without natural rubber latex
- Includes 4 AA batteries
- 5-year warranty

(122-6355)..ea

Advantage™ 6015N Digital Wrist Blood Pressure Monitor

Featuring Smart Logic™ technology and advanced memory capabilities, this monitor measures systolic and diastolic pressure as well as pulse. The Smart Logic™ technology determines the ideal inflation level.
Key features:
- Pressure accuracy: +/- 3 mm Hg
- Pulse range: 40–200 BPM
- Stores the last 99 readings for 2 users
- Wrist cuff fits sizes from 5.3" to 7.7"
- Automatic shut-off feature
- Made without natural rubber latex
- Includes 2 AAA batteries and a compact storage case
- 5-year warranty

ePM 10A Configured Patient Monitor

Exceptional user interface and enhanced parameter functionality, delivering a monitoring solution to fit multiple care environments. Immediate and measurable benefits of the smartphone-like user interface that delivers 98% of all common monitoring functions with just 2 gestures, reducing time clinicians spend navigating monitor functions, and more time on what matters most: patient care. Advanced monitoring options include 3- and 5-lead ECG, SpO$_2$, NIBP, respiration, and temperature supporting multiple clinical workflows. ePM 10A has a compact, ergonomic design that is perfectly suited for healthcare facilities managing a steady flow of patients daily. Add optional CO$_2$ capability to aid clinicians to identify signs of patient deterioration due to respiratory distress. Manufactured with industry-leading plastics that stand up to the most stringent medical-grade cleaners. The concealed grab-and-go handle eliminates hard-to-clean crevices and eases clinical workflow while on the move. Flexible mounting options for bedside and transport.

• Dimensions: 10.6" x 9.9" x 6.3"

ePM 12MA Patient Monitor

Exceptional user interface and enhanced parameter functionality, delivering a monitoring solution to fit multiple care environments. Immediate and measurable benefits of the smartphone-like user interface that delivers 98% of all common monitoring functions with just 2 gestures, reducing time clinicians spend navigating monitor functions, and more time on what matters most: patient care. Advanced monitoring options are integrated: 3- and 5-lead ECG, SpO$_2$, NIBP, respiration, and temperature-supporting multiple clinical workflows. The ePM 12MA features a semimodular design with a plug-and-play module structure that adds monitoring functions such as CO$_2$ and multigas, where and when needed. The 12MA eGM multigas module automatically identifies and measures the inspired and expired values of O$_2$, CO$_2$, N$_2$O and 5 anesthetic agents, providing a compact, yet comprehensive OR monitoring solution. Manufactured with industry-leading plastics that stand up to the most stringent medical-grade cleaners. Concealed grab-and-go handle eliminates hard-to-clean crevices and eases clinical workflow while on the move. Flexible mounting options for bedside and transport.

ZOLL Medical's interactive AEDs guide you through the process of performing high-quality CPR with voice, text, and image prompts. Rigorous, automatic self-testing ensures they are always ready. Each AED has unique features to provide the best solution for your needs.

ZOLL®

AED Plus®

* Real CPR Help® technology
* Industry leading five-year battery and pad life
* One-piece pad design

(866-7559) Semi-Automatic Unit
Package includes: AED, electrodes, batteries, carry case.

Powerheart® G5 AED

* Intellisense® CPR Feedback (ICPR)
* Non-polarized pads (can be placed in either position)
* Dual language functionality

(139-5101) Semi-Automatic Unit
Package includes: AED, electrodes, battery.

ZOLL R Series®

* Professional defibrillator/monitor
* OneStep Complete™ electrodes with integrated three-lead and Real CPR Help® technology

(127-9979) Professional Defibrillator
Package includes: Monitor/defibrillator, battery, 2 sets of OneStep electrodes.

ZOLL®

ZOLL AED Plus®

Bringing Lifesaving Defibrillation to Everyone
The only AED with CPR feedback and an ECG waveform. By supporting CPR as well as defibrillation, this device can help every unresponsive victim. Features Real CPR Help®, a tool that is able to actually see what user is doing and provides audio and visual prompts to help them do it with confidence and clarity.

• Provides a one-piece electrode for accurate placement
• Uses consumer lithium batteries that are easy to replace, long-lasting, and inexpensive

GE HealthCare

Vscan Extend* R2 Dual Probe DICOM Handheld Ultrasound

A general-purpose diagnostic ultrasound imaging system that can enable qualified and trained health care professionals to visualize and measure anatomical structures and fluid. Its pocket-sized portability and simplified user interface enable integration into examination and training sessions. Information can be used for basic or focused assessments, procedural guidance, and in conjunction with other medical data for clinical diagnostic purposes during routine periodic monitoring and triage assessments for adult and pediatric patients. Unit supports applications for cardiac, abdominal, renal, obstetrics and gynecology, urology, fetal, adult cephalic, peripheral vascular imaging (arteries, veins, lower extremity, and carotid), small organs including thyroid and musculoskeletal (long bone, hip, shoulder, elbow, and knee joints), evaluation of presence of fluid, thoracic/lung (pleural motion/sliding and line artifacts), pediatrics, imaging guidance for needle/catheter placement (paracentesis, pericardiocentesis, thoracentesis, and amniocentesis), and procedure guidance for arterial or venous vessels (central lines and upper extremity). DICOM** configuration provides the ability to export images wirelessly to DICOM servers or to shared Windows*** network folders, along with wireless access to the GE Marketplace for download and installation of Vscan Extend apps. It also allows the transfer of images or videos via USB cable connection to a PC. The product is complemented with a Vscan* web portal, including online access to product and clinical information. In some countries, 1–60-gm bottle of gel may also be included in the standard configuration.

GE HealthCare

Vscan Air™

This wireless, handheld ultrasound system enables whole-body scanning and delivers crystal-clear images.
- The power of a high-performance ultrasound machine in a small, lightweight wireless solution
- Optimized for the most common adult and pediatric physical exams to support a broad range of applications
- The dual probe's 2-sided design allows for both shallow and deep exams

Butterfly iQ3 All-In Bundle

Butterfly iQ+

The world's first and only handheld, single-probe, whole-body ultrasound system powered by Ultrasound-on-Chip™ technology. Designed to make conducting an ultrasound very easy. Simply connect the probe to a compatible iOS or Android device, select from 20+ presets in seconds with the swipe of a finger, and start scanning.

- Powered by Ultrasound-on-Chip™ technology, it includes 5 imaging modes with distinct applications across specialties: B-mode, M-mode, Color Doppler, Power Doppler, and Pulsed-Wave Doppler
- Always ready when it is needed, device has been proven by military-grade testing to withstand being dropped from waist length
- Water- and dust-resistant
- Equipped with a replaceable stomp and compression-tested cable
- Annual memberships tailored to meet any needs, whether for an individual or a team. Most include features such as unlimited cloud storage, education, collaboration, diagnostic, and procedural tools

Aaron® Surgi-Center|Pro Electrosurgical Generator

The Aaron ® Surgi-Center|Pro is a 200-watt, high-power operating-room generator. The unit incorporates the power and safety of a premium OR generator at a significant savings to the medical facility. The system delivers 12 monopolar and bipolar RF energy modalities to provide a high level of surgical precision.

• Offers pure cut, 4 modes of blend, 3 modes of coagulation, bipolar coagulation, and Bovie FCFS™ technology
• Designed with state-of-the-art safety features
• Backed by a 4-year manufacturer's limited warranty

CONMED CORPORATION

Hyfrecator® 2000
Electrosurgical Unit
Dual-microprocessor technology makes it one of the safest units for in-office procedures. Controlled Tissue Response™ minimizes tissue damage, resulting in excellent clinical outcomes. Over $100 in accessories included at no extra charge.

- Procedural versatility: With a multitude of applications in such diverse specialties as dermatology, plastic surgery, gynecology, dental and oral surgery, ophthalmology, otolaryngology, proctology, and urology, this unit lets you perform a wide variety of desiccation, fulguration, and coagulation office procedures. Includes 50 blunt and 50 sharp, non-sterile disposable hyfrecator tips

- Precise power settings: Digital 2/10 incremental readouts in the critical 0–5-watt low-power range enhance your skill, accuracy, and control when performing delicate procedures
- Convenient fingertip control: ergonomic, handheld pencil enables you to remotely activate the unit and make rapid or slow power adjustments

Complete Unit
(520-9134)...ea
Contains: 1 remote control, 1–#7-800-5 reusable switching pencil, 2 Electrolase® disposable electrodes (1 of ea: #7-100-12 sharp & #7-101-12 blunt), 2–#7-796-19 sterile sheaths, 2–#7-796-18 non-sterile sheaths, 1–#7-796-20 wall-mounting kit & 1 operator's manual.

HENRY SCHEIN®
High-Frequency Desiccator

Designed and engineered to be the most reliable and durable desiccator available today, this unit's life is prolonged by incorporating the latest in chip technology and reducing the number of internal parts, thereby generating less internal heat. Post-procedure and long-term cleanup are simplified by its nonabsorbing, nonstaining, high-impact plastic case.

• 40-watt high-frequency desiccator
• Adjustable in $\frac{1}{10}$-watt increments in the first 10 watts, in monopolar and bipolar
• More accurate power with Universal Power Control 100–240-volt AC
• Less to do and less to buy makes this the most cost-effective and user-friendly unit on the market
• This desiccator is a ground reference unit, which means no grounding pad is required
• 4-year warranty

#A942
(570-0583)..ea

HENRY SCHEIN®
Electrosurgical Generator and High-Frequency Desiccator

This electrosurgical generator is a high-frequency desiccator with cutting ability. One half of the unit is the Henry Schein High Frequency Desiccator. The other half is an electrosurgical generator that features 50 watts of cutting power and coag capabilities—plenty of power for most cutting procedures performed in the doctor's office.

• 40-watt high-frequency desiccator
• 2 machines in 1 convenient package
• Adjustable in $\frac{1}{10}$-watt increments in the first 10 watts, in monopolar and bipolar
• No grounding pad is required during desiccation mode
• 4-year warranty

#A952
(570-0582)..ea

HENRY SCHEIN®
Desiccator Tips

Utilize the standard $\frac{3}{32}$" (2.4 mm) stainless steel shaft. All molded electrodes feature safety-grip insulators combining patient and user safety with easy insertion into and removal from the surgical pencil.

**midmark®**

Midmark M11®
Steam Sterilizer

The M11 is engineered with user-friendly features to simplify compliance, streamline cycle operations, and enhance device care tracking. These improvements help minimize transcription and documentation errors, which can account for up to 56% of sterilization issues. Automated mechanical monitoring and chemical indicator reporting not only save time but also facilitate easier staff training, instilling confidence in the sterilization process.

Key features:

- 5" fingerprint-resistant touchscreen allows for easy navigation of cycle setup and other operations, even while wearing gloves. Users can choose between light and dark modes to suit their preferences.
- Stay prepared for audits with built-in reminders, notifications, and user authentication. The sterilizer offers unlimited storage for routine care events throughout its lifespan, along with automated cycle recordkeeping.
- Midmark sterilizers are built to last, with an upgraded chamber design that extends the device's life to 25,000 cycles. This can reduce the need for maintenance by both users and certified technicians by more than half.
- Height: 18.6" (47.2 cm), Width: 17.8" (45.2 cm)
- Chamber dimensions: 11" x 18" (27.9 cm x 45.7 cm)
- Water reservoir capacity: Full: 1.4 gal (5.3 liter); Usable: 0.8 gal (3 liter)

Vistacool™ Direct to-Drain Cooling System for Autoclave Wastewater

Effciently cools sterilizer wastewater before safely directing it to the drain. This non-electric, self-monitoring, and self-regulating system allows users to focus more on patient care and less on equipment maintenance.

Key benefits:

- Eliminates the need to handle hot wastewater tanks, preventing potential injuries and avoiding damage to cabinetry from spills or overflows
- Prevents scalding hot wastewater from damaging plumbing with built-in backflow prevention that meets or exceeds local plumbing codes
- Automates a time-consuming task with a simple, self-monitored system, reducing the need for manual intervention
- Dimensions (including fittings): 4"W x 13"L x 17"H (10.2 cm x 33.1 cm x 43.2 cm)
- Tank volume: 3 gal (11.4 liter)

trophon®2 Ultrasound Probe Disinfection Device

This fully enclosed, automated high-level disinfection (HLD) system streamlines workflow with a simple, fast, and integrated solution. Designed specifically for patient examination rooms, the trophon2 enables efficient point-of-care reprocessing.

Key features include:
- Enhanced user compliance and audit readiness through automation, with comprehensive data capture throughout the reprocessing workflow
- AcuTrace® RFID technology that records operator, probe, and cycle data to ensure and demonstrate compliance
- A printer that generates labels with AcuTrace inputs and disinfection results
- The ability to download disinfection records to a USB
- An enclosed system with an easy-close door that seals automatically
- A safe-to-handle disinfection cartridge operable with gloves
- No special ventialtion requirements
- Environmentally friendly design for safe and easy disposal
- Compatible with more than 1,300 ultrasound probes; approved and endorsed by 26 probe manufacturers

STERIS®

Dart® Daily Air Removal Test

An easy and accurate way to test air removal and steam penetration in prevacuum steam sterilizers. This easy-to-use product is a lightweight, compact, one-piece system that is preassembled and ready for use. It eliminates the need to spend time folding towels and preparing packs necessary for traditional Bowie Dick Test Packs. Most important, the Dart Daily Air Removal Test is reproducible— inconsistencies associated with traditional Bowie Dick Test Packs are eliminated.
• Results are immediately visible and easy to read through the clear vial
• Indicator strip is easy to retrieve and can be stored as a permanent record

AtmosAir™

Breathing Is Believing

Potential Benefits:

Superior reduction of particles and spores that can trigger allergy and asthma symptoms. Proven reduction of staphylococcus and related MRSA and other microbials. Continuous 24/7 use offers enhanced protection against mold, bacteria, allergies, germs, and more. Elimination of distracting odors in waiting rooms, emergency admissions, patient rooms, cafeterias, food service areas, soiled linen areas, trash storage areas, and more. Potential energy savings through reduced outside make-up air. Unmatched contaminant removal ability can allow enhanced indoor air quality (IAQ) without restrictions to airflow typical of filtration. Saves on HVAC operating costs.

• Waiting rooms, patient rooms, critical care, soiled linen, cafeterias, food service, and rehabilitation areas
• Portable units for direct solutions, as well as in-duct systems for whole areas
• Enhanced IAQ without increase in operating costs and energy use
• Improved IAQ will yield reductions in absenteeism and increased productivity of staff

PowerFlo™ 50 Hydration System

Proper hydration and heat-related illnesses are always issues when dealing with athletes, just like dependability, safety, and storage are always issues when considering a piece of equipment. Built to satisfy all these demands and help keep your players safe and on the field. Power-coated metal cart provides an excellent platform for the 50-gal tank. Its durability is matched by the unique antitip autosteering system and 10 pneumatic tires. Utilizing the same proven pump and battery system of the PowerFlo allows for easy access to replacement parts when it is time to service the unit. Every component of this unit that comes into contact with the water is either water-potable or made of an FDA-approved material for drinking water.

General-Purpose Freestanding Undercounter Refrigerator

Intended for general-purpose applications only where precise temperature control and maintenance are not essential and there are no requirements for temperature alarms.

- Swing door with keyed door lock
- 3 shelves (1 fixed/2 adjustable)
- Interior light
- HFC-free refrigerant (R600A), foam insulation, and packaging
- UL/C-UL listed
- Temperature range: 0°C to 10°C
- Capacity: 5 cu ft
- Exterior dimensions: 20¼"W x 22" D x 31½"H
- 1-year parts and labor warranty

#ABT-HC-UCFS-0504W

This unit must have 4" clearance on sides and back for adequate ventilation.

HENRY SCHEIN®
Vaccine Temperature Data Logger

- High accuracy
- 24 million readings
- Maximum of 170 files (.csv)
- Internal (ambient) and external (fridge/freezer) sensors reading display
- Minimum and maximum reading memories
- Low and high alarm limits setting
- Flashing light alarm indicator
- °C or °F scale
- Real-time display
- Waterproof external sensor
- Low battery indicator
- Removable SD memory card or USB interface for data retrieval
- Optional external power

Helmer SCIENTIFIC

i.Series® iPR120-GX Pharmacy Refrigerator

20.2-cu-ft Capacity, Glass Door, 2 to 10°C

GX Solutions and the i.C3® Information Center set i.Series® models apart by providing a professional medical-grade refrigerator with advanced monitoring and control. This pharmaceutical-grade refrigerator is designed for storing medications, vaccines, and other pharmaceuticals. It is NSF/ANSI 456 vaccine storage-certified and provides superior stability, uniformity, and recovery. It also has the added benefits of quiet operation, low heat output, and energy savings, all thanks to the advanced OptiCool™ technology.

• Provides continuous temperature monitoring, event logs, temperature graphs, and more
• Designed specifically for the central pharmacy, medication rooms, clean rooms, satellite locations, and outpatient clinics
• 50–65% more efficient than traditional technology
• Quiet operation (47 dB) to create fewer distractions and better working environment
• Audible and visual alarms include power failure, high- and low-temperature alarms, door ajar, condenser temperature, and low battery
• Includes Certificate of Calibration generated with an ISO 17025 reference thermometer
• Energy Star® certified

Helmer SCIENTIFIC

i.Series® iLF105-GX Laboratory Freezer

5.3-cu-ft Capacity, Solid Door, -15 to -30°C

A GX Solutions professional medical-grade, -30°C freezer. Designed for the unique needs of critical health care applications, such as storing samples, reagents, controls, and frozen vaccines. It delivers optimized control in 3 important areas: temperature, noise, and energy management.

• Powered by OptiCool™ technology, this freezer provides improved performance and user experience through energy efficiency, low noise levels, and stable storage environments to safeguard valuable patient samples, frozen vaccines, and more
• 30% more efficient than traditional technology
• Digital microprocessor temperature controller, with built-in alarms, includes minimum/maximum display and reset
• Energy Star® certified
• Powerful i.C3® Information Center is exclusive to i.Series® models and provides constant temperature monitoring, multiple information logs, and security features
• GX Solutions is the first professional medical-grade line of freezers for clinical laboratories, pharmacies, and other health care facilities
• NSF/ANSI 456 Vaccine Storage Standard certified

PHCbi

High-Performance Undercounter Medical Freezer

Designed to maintain temperatures between 5°F and -13°F (-15°C and -25°C) with a tight uniformity of ±5°C for storing critical vaccines and biologics, this model is engineered to meet CDC guidelines in a small footprint. Precise temperature control and uniformity protect vaccine and biologic viability whether the unit is loaded or empty.

• Capacity: 5 cubic ft
• 3 coated steel wire shelves: 19.2" x 14.75"
• Temperature control range: 5°F to -13°F (-15°C to -25°C) in 0.1°C increments
• Alarms: high/low temperature
• Refrigerant: 6-600a
• Door swing: right hinge
• Exterior dimensions: 34.1"H x 23.8"W x 23.7"D
• Interior dimensions: 25.6"H x 19.9"W x 17.1"D

PHCbi
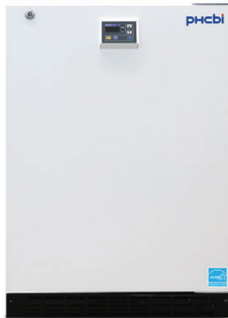

Small Medical Refrigerator

This laboratory undercounter refrigerator combines high-performance temperature control with environmentally friendly refrigerants and energy efficiency. Precision temperature control and uniformity prevent the interior from cooling below freezing and risking vaccine and biologic viability, whether the unit is loaded or empty. Engineered to meet the strict regulatory guidelines of the CDC, ANSI, and NSF.

• Exterior dimensions: 34.1"H x 23.5"W x 23.7"D
• Interior dimensions: 25.6"H x 19.9"W x 17.1"D
• Capacity: 5 cubic ft
• Refrigerant: R-600a
• 36° to 46°F (2°C to 8°C)
• High/low temperature alarm

XP-300™ Automated Hematology Analyzer

With its simplified operation, the robust and reliable XP-300 is ideal for clinics, satellite laboratories and research testing. It provides a complete blood count (CBC) with 17 different parameters, including a 3-part white blood count (WBC) differential with an absolute neutrophil count (ANC). The XP-300 also comes in Plus and Linc models, both of which are HL7-ready for the EMR. The Plus model's software package includes a color touchscreen laptop with a unidirectional instrument interface. The Linc software package includes a desktop platform with a bidirectional interface.

- 3-part differential
- Only 2 reagents
- 50-µl sample volume
- 60 samples per hour
- Bar code reader and graphic printer standard
- Onsite implementation
- Additional features on the XP-300+M include:
- Automatic QC assay value upload
- EMR bidirectional interface, HL7 ready
- Multiple site connectivity to EMR
- Unlimited reference range programmable files
- Option for up to 5 additional instrument interfaces
- QC module
- Printable reports
- Multiple patient demographic fields

BECKMAN COULTER

DxC700 AU Chemistry Analyzer with ISE

Get the right results at the right time with one high-performing system. This chemistry analyzer was designed with input from clinical laboratory professionals, and created to deliver maximized uptime, high reliability, and precise performance.

- Prioritization of urgent tests with STAT interrupt feature provides optimal turnaround time
- Easy operator maintenance with "3 & 60"— consumables are replaced in 3 steps within 60 seconds
- Utilizes concentrated reagents to reduce storage space requirements
- Long-lasting ISE (ion selective electrodes) that last a minimum of 6 months or 40,000 samples
