## Medical tapes and wraps

# Drive efficiency in your clinical practice and reduce tape SKUs

A choice that's critical to care. At Solventum, formerly 3M Health Care, we've made it easy to choose the right securement for each patient and application, with four classes of securement that can work harder and smarter.

### Non-adhesive

#### 3M™ Coban™ NL Non-Latex Self-Adherent Wrap<sup>†</sup>

Non-adhesive securement for clinical applications such as blood draws, dressings, immobilization, securement for difficult to dress areas (head, fingers, toes) and support and mild compression for soft tissue injuries (i.e. strains, sprains).\*

### Multi-purpose

#### 3M™ Micropore™ S Surgical Tape<sup>†</sup>

Multi-purpose securement for clinical applications such as blood draws, light-weight dressings, IV lines and tubing (secondary securement) and non-critical tubes.

### Flexible

#### 3M™ Medipore™ H Soft Cloth Surgical Tape

Flexible securement for clinical application such as dressing and added pressure, IV lines and tubing (secondary securement), when swelling or movement is anticipated, central venous catheters (secondary securement), chest tubes and surgical drain tubes.

### High-adhesion

#### 3M™ Durapore™ Surgical Tape

High-strength securement for clinical applications such as urinary catheters, nasogastric tubes, orogastric tubes and patient positioning.

# The Right Tape for the Right Care

As a living breathing organ, our skin behaves differently from person to person, making selecting the correct wound care supplies essential to proper care.

Serving US healthcare providers for over 30 years, Dukal's trusted and extensive line of medical tapes ensures clinicians have right product for the right care.

## Elastic Tape

Strong adhesive with stretchable, flexible elasticity. Cut with scissors after application.

## Cloth Tape

The standard and most versatile medical tape, cloth medical tape, is a durable option designed for strength. Easy to tear, designed for bilateral tearing without the need for scissors. The gentle adhesive will leave minimal residue on skin.

## Soft Cloth Tape

Soft cloth medical tape is a flexible option that conforms and moves with the patient. Can accommodate swelling and the gentle adhesive has minimal impact on skin.

## Transparent Tape

A high quality, porous, clear medical tape perforated for added breathability and bi-directional tearing. Transparent medical tape conforms and stretches to accommodate movement making it excellent for IV sites, dressings, and tubing retention.

## Paper Tape

Gentle on skin, lightweight and microporous; paper tape won't harm delicate wounds making it a great option for delicate or elderly skin.

## Waterproof Tape

Seen primarily in the industrial safety market and first aid kits, waterproof tape has a more aggressive adhesion while retaining self-tearing properties for easy application.

## Retention Tape

Retention tape is a soft and flexible medical tape ideal for difficult-to-tape areas. It provides light compression without constriction and is perforated every two inches for ease of use. The printed grid pattern on the s-curve release liner allows for greater wound reference and monitoring, while allowing simple removal of the liner even when wearing gloves.

626 Barrier-Free® Examination Chair  
MIDMARK

Many health care providers are not aware of current standards for proper blood-pressure measurement. If this isn't addressed, it leaves health systems at serious risk. 9.8% of the population is affected by overestimation of high blood-pressure errors. Multiply the cost of treatment for hypertension by the typical patient panel size and the cost of overtreatment could be as much as \$135,000 per each practicing physician. The impact of overmedication can also result in complications such as dizziness, fainting, exhaustion, or even patient falls. The Midmark 626 is the first exam chair of its kind designed to promote proper patient positioning for a more accurate blood-pressure measurement.

- Easily position patients for a better BP measurement
- Powered movement of the back section ensures the patient's back is supported
- A Barrier-Free® low chair-height allows the majority of patients, even female patients with heights in the 3rd percentile, to place their feet flat on the floor

Ritter® 224 Barrier-Free®  
Examination Chair  
MIDMARK

The number of elderly and obese in the U.S. is steadily growing, and over one fifth of adults in America are disabled. Assisting patients with mobility limitations onto exam chairs has become a frequently performed task. Although caregivers working in health care facilities are in one of the most at-risk professions for musculoskeletal disorders, little has been done to evaluate and reduce risk. The Ritter 224 is designed to offer low and high positioning heights so you can provide the best care to all patients, whether treating the elderly, expectant mothers, or patients with disabilities.

## Welch Allyn FlexiPort™ Blood Pressure Cuffs BAXTER

True standardization in a snap. Standardize your facility and use one cuff on virtually all electronic and manual blood-pressure devices—without Y-tubes, tethers, or any other confusing, difficult-to-manage connector-and tube configurations. Every cuff can be used as one- or two-cuff, letting you use one cuff in virtually every room and on every device you have in-house.

- Part numbers are reduced by up to 60%, simplifying ordering and inventory
- Reduce the risk of cross-contamination by using one cuff per patient

## Adult ECG Electrodes

### CONMED

Clear Neoderm™ tape allows visual monitoring of the patient's skin condition at all times. Perforated tape permits skin ventilation and moisture evaporation for increased patient comfort. Conforms to patient's body without pulling on the skin. Will not absorb fluids. Foam electrodes are ideal for general-purpose monitoring. Closed-cell foam keeps fluids from penetrating. Pull tab makes it easy to apply and remove the electrode.

## TOPICAL SKIN ADHESIVE - OCTYL

High-Strength 2-Octyl Cyanoacrylate Formulation

### Advantages

Rapid set time

Flexibility without a plasticizer

Ergonomic ampule designed for ease of handling and targeted application

Provides an effective microbial barrier and water-resistant protection

High tensile strength

Unique formulation will not solidify in ampule, allowing all .5 ml to be used

Gravity fed applicator delivery system - no need to squeeze ampule

Glass-free reservoir containing 0.5mL of Topical Skin Adhesive

Rigid sleeve helps prevent bending of applicator during adhesive application

Angled applicator tip changes color in the presence of adhesive

Perforation in the middle, allowing ease of adhesive flow

### Additional Information

Polymerization starts when adhesive comes in contact with tissue or fluid.

All 0.5 ml of adhesive can be used on the patient, as adhesive will not solidify in the ampule.

Topical Skin Adhesive will remain attached to the skin surface until natural cellular regeneration occurs (approx. 5-7 days). If needed, any standard adhesive remover product may be used to release the adhesive from the skin. Peel off the film, do not pull the skin apart.

## Electrosurgical Generator and High-Frequency Desiccator

This electrosurgical generator is a high-frequency desiccator with cutting ability. One half of the unit is the Henry Schein High Frequency Desiccator. The other half is an electrosurgical generator that features 50 watts of cutting power and coag capabilities—plenty of power for most cutting procedures performed in the doctor's office.

- 40-watt high-frequency desiccator
- 2 machines in 1 convenient package
- Adjustable in 1/10-watt increments in the first 10 watts, in monopolar and bipolar
- No grounding pad is required during desiccation mode
- 4-year warranty

#A952

## High-Frequency Desiccator

Designed and engineered to be the most reliable and durable desiccator available today, this unit's life is prolonged by incorporating the latest in chip technology and reducing the number of internal parts, thereby generating less internal heat. Post-procedure and long-term cleanup are simplified by its nonabsorbing, nonstaining, high-impact plastic case.

- 40-watt high-frequency desiccator
- Adjustable in 1/10-watt increments in the first 10 watts, in monopolar and bipolar
- More accurate power with Universal Power Control 100–240-volt AC
- Less to do and less to buy makes this the most cost-effective and user-friendly unit on the market
- This desiccator is a ground reference unit, which means no grounding pad is required
- 4-year warranty

Discover the difference **BD Vacutainer® UltraTouch™** push button blood collection sets can make.

The **BD Vacutainer® UltraTouch™** blood collection set improves the overall phlebotomy experience for both patients and clinicians:

- Reduction in perceived overall patient pain<sup>1</sup>
- Faster tube fill times<sup>2</sup>
- Ability to use a 25-gauge needle without compromising sample quality<sup>3</sup>
- Up to 88% reduction in needlestick injuries<sup>4</sup>

## Pharma-Vac Performance Series Vaccine Refrigerators **ACCUCOLD**

This line of refrigerators supports meeting regulations and guidelines from the CDC, State Agencies, World Health Organization, and other health ministries on vaccine storage and handling. Designed with a hydrocarbon refrigerant, they provide an energy-efficient solution to vaccine storage. Units are Pyxis, Omnicell, and AcuDose RX compatible.

- Certified to the NSF/ANSI 456 Vaccine Storage Standard
- Adjustable-cycle defrost operation ensures the unit avoids temperature spikes and ice buildup
- Battery-powered alarm sounds if the power connection is interrupted
- Digital controls with a large LED readout in Celsius or Fahrenheit for intuitive temperature management
- Multiple shelf positions spaced at ½" to accommodate virtually any size
- Ecofriendly hydrocarbon-based refrigerant for a greener footprint that meets current CARB regulations
- Environmentally friendly design without ozone-damaging chemicals

## i.Series® iLF105-GX Laboratory Freezer

### **HELMER SCIENTIFIC**

5.3-cu-ft Capacity, Solid Door, -15 to -30°C

A GX Solutions professional medical-grade, -30°C freezer. Designed for the unique needs of critical health care applications, such as storing samples, reagents, controls, and frozen vaccines. It delivers optimized control in 3 important areas: temperature, noise, and energy management.

- Powered by OptiCool® technology, this freezer provides improved performance and user experience through energy efficiency, low noise levels, and stable storage environments to safeguard valuable patient samples, frozen vaccines, and more
- 30% more efficient than traditional technology
- Digital microprocessor temperature controller, with built-in alarms, includes minimum/maximum display and reset
- Energy Star® certified
- Powerful i.C3® Information Center is exclusive to i.Series® models and provides constant temperature monitoring, multiple information logs, and security features
- GX Solutions is the first professional medical-grade line of freezers for clinical laboratories, pharmacies, and other health care facilities

## i.Series® iPR120-GX Pharmacy Refrigerator

### **HELMER SCIENTIFIC**

20.2-cu-ft Capacity, Glass Door, 2 to 10°C  
GX Solutions and the i.C3® Information Center set i.Series® models apart by providing a professional medical-grade refrigerator with advanced monitoring and control. This pharmaceutical-grade refrigerator is designed for storing medications, vaccines, and other pharmaceuticals. It is NSF/ANSI 456 vaccine storage-certified and provides superior stability, uniformity, and recovery. It also has the added benefits of quiet operation, low heat output, and energy savings, all thanks to the advanced OptiCool® technology.

- Provides continuous temperature monitoring, event logs, temperature graphs, and more
- Designed specifically for the central pharmacy, medication rooms, clean rooms, satellite locations, and outpatient clinics
- 50–65% more efficient than traditional technology
- Quiet operation (47 dB) to create fewer distractions and better working environment
- Audible and visual alarms include power failure, high- and low-temperature alarms, door ajar, condenser temperature, and low battery
- Includes Certificate of Calibration generated with an ISO 17025 reference thermometer
- Energy Star® certified

### FebriDx® Point Of Care Rapid Test LUMOS

This rapid point-of-care test uses a fingerstick blood sample to aid in the differentiation between bacterial infection and nonbacterial etiology. Intended to be used in urgent and emergency care settings. FebriDx External Controls are used as assayed quality-control samples to assess the performance and reliability of the FebriDx test.

- Results after 10 minutes increases confidence in whether or not to prescribe an antibiotic
- Highly sensitive/specific dual biomarker technology provides reliable differentiation of bacterial and nonbacterial infections
- All-in-one, instrument-free test device means no expensive equipment and a fully portable solution

## Solana Molecular Testing Platform GUIDEL

Solana is a benchtop instrument that combines Quidel's proprietary helicase-dependent amplification (HDA) with fluorescence detection to deliver molecular results you can trust, faster than ever before. The Solana testing system is easily accessible and can be seamlessly integrated. Solana's workflow is easy and flexible, capable of testing a single specimen or batching up to 12 tests at a time. Solana offers an intuitive, touch-screen interface with guided operation and customizable settings. The instrument possesses 4 USB ports, bar-code technology, an external printer, and LIS connectivity. Results are reported on the screen, stored in the instrument and can be saved to a USB drive, printed, and/or sent to the LIS. Solana also comes with the power of Virena®, Quidel's proprietary wireless data management and surveillance ecosystem.

## BD Veritor™ Plus System BD

The wireless BD Veritor™ Plus System provides health-care providers and laboratorians in physician offices, clinics, hospitals, and integrated delivery networks (IDNs) with objective, lab-quality immunoassay test results within minutes. This fast and accurate solution streamlines the point-of-care (POC) diagnostic workflow and allows providers to quickly review patient results and determine the appropriate treatment in a single consultation. The new system can help detect infectious diseases such as influenza A and B, respiratory syncytial virus (RSV), and group A strep while the patient is still on site, which can enable faster decision-making for an earlier intervention opportunity.

- Faster access to test results: Help inform appropriate and targeted treatment decisions
- Improved workflow: The BD Veritor™ Plus Analyzer improves workflow with an Analyze Now or Walk Away mode, providing test results (with a print-enabled function) and aiding in decision-making while the patient is on site
- Improved traceability: The BD Veritor™ InfoScan module can scan 3 different identifiers (operator ID, specimen ID, and test kit/lot) that can be locally recorded, printed, or downloaded, and reduces hands-on time through automated documentation
- Modularity: Provides a unique solution to meet each testing site's preference
- Connectivity: BD Veritor™ InfoSync module provides the same benefits as BD Veritor™ InfoScan. Connects and documents tests results across multiple sites and can integrate with a hospital electronic medical record or laboratory information system
- Advanced particle technology: Enhances sensitivity by using a proprietary process to produce highly stable, modified colloidal metal particles.
- Adaptive read technology: Compensates for background. Nonspecific binding helps improve specificity to reduce false-positive results

## CardioChek® Plus Analyzer

**HENRY SCHEIN®**

Fast, Accurate, Efficient Lipid and Glucose Results at the Point of Care

Recognizing the strong connection between heart attack, stroke, and diabetes, the CardioChek® Plus Analyzer provides rapid, on-site blood-chemistry values and measurements to help identify at-risk individuals.

- Fast: On-site lipid and glucose results in as little as 90 seconds; simple, quality-control testing
- Portable: compact and lightweight, easy to transport and store; handheld and battery-operated; and room-temperature test strips
- Patient-friendly: fingerstick with sample size of 1.1 µL to 40 µL
- Wireless communication: easy data transfer
- Measures total and HDL cholesterol, triglycerides, and glucose
- Calculates LDL and non-HDL cholesterol as well as TC/HDL and LDL/HDL ratios
- Certified accuracy
- CLIA waived
- Meets NCEP guidelines for accuracy and precision
- FCC- and ISO-certified wireless communications
- CRMLN-certified for CHOL and HDL tests
- FDA cleared

## Urispec™ Plus Urinalysis Reader & Urispec™ 11-Way Urine Strip Promotion

**HENRY SCHEIN®**

Provides dependable urine status results to detect early stages of many diseases, such as diabetes, kidney disease, and urinary tract infections. Instrument-read results have long proven to be advantageous for both busy health care professionals and patients. Comprehensive interface options and the optimized printouts minimize risk associated with manual transcriptions. Reliable results can be obtained virtually immediately at the point of care. Easy switch between different test strips: Urispec Plus is for use with the Urispec 11-Way, 5-Way Plus, 4-Way, and GP+A urine test strips for up to 11 parameters for the semiquantitative detection of occult blood, urobilinogen, bilirubin, protein, nitrate, ascorbic acid, ketones, glucose, pH, specific gravity, and leukocytes. Use of these test strips on the Urispec Plus analyzer is CLIA-waived.

- CLIA-waived
- Readings eliminate subjectivity of visual color interpretation, which makes urinalysis simpler and more reliable
- Features no-touch operation: After strip placement, measurement starts automatically, which makes urinalysis faster and more hygienic
- Easy switch between different test strips: Urispec Plus is for use with Urispec 11-Way, 5-Way Plus, 4-Way, and GP+A urine test strips

## Urispec™ 11-Way Urine Reagent Test Strips

**HENRY SCHEIN®**

Urine Reagent Test Strips

For urinalysis by the dip-and-read technique. Similar to all Multistix® 10 SG Plus Ascorbic Acid. Tests for glucose, bilirubin, ketone, specific gravity, blood, pH, protein, urobilinogen, nitrite, and leukocytes. Also includes additional ascorbic acid analyte pad. The importance of the addition of an ascorbic acid analyte pad is that the glucose test must be repeated if the ascorbic acid reaction is positive. An ascorbic acid content of as little as 5 mg/dL (0.3 mmol) can interfere with a glucose assay in low concentrations. As with glucose detection, blood detection is also disturbed by low concentrations of ascorbic acid, whereas high ascorbic acid concentrations can interfere with the nitrate and bilirubin test zones.

- Unique "read all" feature at 60 seconds
- Similar to Multistix® 10 SG Plus Ascorbic Acid Test and all brands of 10 SG products
- Glucose, bilirubin, ketone, specific gravity, blood, pH, protein, urobilinogen, nitrite, and leukocytes
- Reader available
- Ascorbic acid pad to ensure uncompromised results
- Room-temperature storage

## Urispec™ Urinalysis Controls

**HENRY SCHEIN®**

For Most Brands of Routine Urine Dip Sticks and Pregnancy Tests

A bilevel product packaged in plastic tubes and dropper bottles. Controls are liquid, ready-to-use, and are designed to validate urinalysis reagent strips. Packaged in plastic dip tubes and dropper bottles, they are convenient and easy to use. Long open- and closed-vial stability at 2°C–8°C for 2 years unopened, or 90 days once the Dip Control is opened, and 180 days once the Drop Control is opened. This allows the user ample time to utilize the product before expiration, resulting in cost savings.

- Values for all pregnancy test brands
- Assays for common brands of urine dip for routine urinalysis (2 parameter-10SG)
- Includes values for microalbumin, creatinine, and hCG
- Two distinct levels (normal and abnormal)
- Closed-vial dating up to 2 years with refrigerator storage
- 30-day stability at room temperature

## OSOM iFOB Test Kits SEKISUI

Easy-to-use rapid test provides quick, accurate results for detection of fecal occult blood or human hemoglobin for simpler diagnosis of gastrointestinal disorders. The OSOM® iFOB Test is a rapid qualitative test for the immunochemical detection of fecal occult blood/human hemoglobin (hHb) in human fecal specimens as an aid in the diagnosis of gastrointestinal disorders such as diverticulitis, colitis, polyps, and colorectal cancer.

- Aids in prevention—Helps reduce the risk of developing more serious ulcers and other health issues
- Lower healthcare costs—Early diagnosis leads to the reduction of cancer treatment expenses, hospital stays, and long-term care costs
- Improved patient compliance—No dietary or drug restrictions, with an easy-to-use at-home sample collection kit and procedure
- Quick turnaround—Obtain results in 5 to 10 minutes with less than 1 minute of hands-on time
- Trusted results—Highly specific to human hemoglobin with analytical sensitivity of 50 ng hHb/mL buffer or 50 µg hHb/g feces
- QC Inside—2 extra tests included at no additional charge to run external quality-control testing for more confidence in results

## iScreen® OFD–Cotinine ABBOTT

The iScreen® OFD–Cotinine device is a rapid, oral fluid screening test that can be performed any time without the use of an instrument. The test detects elevated levels of cotinine (nicotine metabolite) in oral fluid for accurate determination of smoking status.

- Accurately screen for cotinine (primary metabolite of nicotine)
- Detects up to 1-2 days after nicotine use
- Qualitative detection of cotinine in oral fluids at a cutoff of 30 ng/mL
- Simple collection and testing procedure
- Results in as little as 10 minutes
- Integrated internal procedural control
- CLIA exempt

## binx health<sup>®</sup> io CT/NG Test BINX HEALTH

Designed for use with the binx health io Instrument, this fully automated, rapid, qualitative test is intended for use in point-of-care or clinical laboratory settings for the detection of *Chlamydia trachomatis* and *Neisseria gonorrhoeae* DNA by polymerase chain reaction. The system delivers central lab-quality results in around 30 minutes for both male and female patients. The rapid turnaround time supports test-and-treat patient care at the time of visit for those who need it and curbs unnecessary empiric treatment for those who don't. Additionally, the binx io CT/NG Assay provides clinics with the ability to make a profit performing the testing in-house while providing superior patient care.

- FDA-cleared and CLIA-waived
- Point-of-care (POC) molecular
- Results in 30 minutes
- Sample collection—Male: first catch urine; Female: vaginal swabs (self- or clinician-collected)
- Single-visit results and treatment
- Easy-to-use platform requires no calibration, preventative maintenance, or interpretation of results, and can be used by non-lab-trained personnel

## Determine<sup>™</sup> HIV-1/2 Ag/Ab Combo ABBOTT

The first FDA-approved rapid point-of-care test that detects both HIV-1/2 antibodies and free HIV-1 p24 antigen. This 4th-generation test has the ability to identify HIV sooner than conventional rapid tests, which rely solely on the presence of HIV-1/2 antibodies. It enables health care providers to diagnose HIV infection earlier.

- Innovative: It's the first rapid point-of-care test that detects both HIV-1/2 antibodies and free HIV-1 p24 antigen
- Empowering: Enables health care providers to diagnose HIV infection earlier, allowing individuals to seek medical care sooner
- Dependable: Built-in quality controls let you know the test is working
- Efficient: Requires minimal training, test in 3 simple steps, and presents clear results in just 20 minutes
- Flexible: Multiple sample types; fingerstick and venous whole blood, serum, or plasma samples

## OSOM<sup>®</sup> Trichomonas Rapid Test SEKISUI

The only CLIA-waived, lateral-flow rapid test for detecting trichomonas while providing 95% agreement with culture and wet mount combined.

- Simple to use—Get easy-to-read results in just 10 minutes and 4 easy steps
- Eliminate the need for wet mount—Antigen-based rapid test does not require visualization of live organisms
- CDC-approved method of testing for the detection of *Trichomonas vaginalis*—unaffected by other common infections
- Trust your results—95% agreement against the Composite Reference Standard (culture and wet mount)
- Easy to use—Requires minimal training and no additional equipment
- QC Inside<sup>™</sup>—2 extra tests included at no additional charge to run external quality-control testing for more confidence in results

## Diagnostics Direct Syphilis Health Check<sup>™</sup> ORASURE

Provides results in 10 minutes, enabling patients to learn their status in a single visit. Allows syphilis-positive patients to be connected to care while a lab test is completed for confirmed diagnosis. CLIA-waived for fingerstick whole blood and offers the ability to test in nontraditional testing environments, such as outreach programs and mobile testing clinics. Walk-away procedure allows providers to batch tests, enabling more people to get tested, reducing indirect costs and improving turnaround time. Studies have verified the accuracy at all stages of infection, including latent, which provides the ability to detect infection in pregnant people for identification of potential congenital syphilis at every trimester.

- Ideal for both clinical and nonclinical settings
- Highly accurate: 98.0% sensitivity, 97.2% specificity
- Reads for both IgM and IgG
- Can be easily read in all settings; no need for a reader
- Can be used with people ages 13 years and older
