

MEN'S HEALTH

PRODUCT GUIDE 2025

Your **One Source** for a **Thriving Practice**

Practices are unique and constantly evolving. **Rely on Us** for customized solutions that empower optimal patient & practice outcomes.

www.henryschein.com/medical | 1.800.772.4346 8am-8pm (et)

California customers please use website when ordering for Prop 65 information.

Supporting the long-term health of male patients starts with proactive conversations and informed care.

With life expectancy for U.S. males at just 74.8 years¹—and 14.7% of men age 18 and older reporting fair or poor health²—it’s critical for healthcare providers to help men make healthier choices and stay on top of routine screenings.

Men are more likely than women to get and die from certain cancers³, but early detection and lifestyle changes can make a meaningful difference. By discussing personal risk factors and guiding patients toward regular screenings, you can help lower their chances of serious illness and improve their quality of life.

Make sure your practice is prepared with the right tools from Henry Schein Medical. From screening supplies to everyday essentials, Henry Schein offers trusted products, fast delivery, and dedicated support—so you can focus on providing excellent care.

DIABETES MANAGEMENT

True Metrix® Pro Meter

- No coding
- Tiny, 0.5-µL sample size
- Stores 500 results
- As fast as 4 seconds
- BG range: 20–600
- Data management
- Download capabilities
- Glucose control detection
- Strip-release button

#RE4099P-43

(570-3418) ea

Contains: 1 True Metrix® Pro meter, installed 3-volt battery, instructions for use, logbook & compact carrying case.

True Metrix® Pro Strips

Advanced technologies—the meter, a complex algorithm, chemistry, and electrodes—on the test strip work together as part of the True Metrix® Pro system to produce accurate results. Featuring Triple Sense Technology™, the system provides proven accuracy and confidence in results.

- No-coding technology eliminates need for coding of meter
- Code is assigned during manufacturing process
- Code is printed onto contacts on end of test strip
- Meter reads code on insertion

LIPID/GLUCOSE TESTING

CardioChek® Plus Analyzer

Fast, Accurate, Efficient Lipid and Glucose Results at the Point of Care

Recognizing the strong connection between heart attack, stroke, and diabetes, the CardioChek® Plus Analyzer provides rapid, on-site blood-chemistry values and measurements to help identify at-risk individuals.

- Fast: On-site lipid and glucose results in as little as 90 seconds; simple, quality-control testing
- Portable: compact and lightweight, easy to transport and store; handheld and battery-operated; and room-temperature test strips
- Patient-friendly: fingerstick with sample size of 1.1 µL to 40 µL
- Wireless communication: easy data transfer
- Measures total and HDL cholesterol, triglycerides, and glucose

#PTS-2700-HS

(570-0411) ea

- Calculates LDL and non-HDL cholesterol as well as TC/HDL and LDL/HDL ratios
- Certified accuracy
- CLIA waived
- Meets NCEP guidelines for accuracy and precision
- FCC- and ISO-certified wireless communications
- CRMLN-certified for CHOL and HDL tests
- FDA cleared

PTS Panels®

Lipid/Glucose Smart Bundle 2-Pack

#PTS-2729-HS

(570-0412) 2/pkg

Contains: 1 of each: 15-count lipid test-strip vials & 15-count vial of glucose test strips.

PTS Panels® Starter Kit

#PTS-4060-HS

(570-1036) ea

Contains: 1 analyzer, 60 lipid/glucose tests, multichemistry controls & 40-µL cap tubes.

PTS Panels®

Lipid Test Strips

#PTS-1710-HS

(570-0414) 15/box

Contains: 15 test strips.

A1C NOW TESTING

A1CNow®+ Test

The handheld monitor provides accurate, in-office A1C results, enabling physicians to make on-the-spot treatment decisions for diabetes patients.

- In-office testing: no waiting for lab results
- Results in just 5 minutes
- Hands-on procedure time is less than 1 minute
- Simple, 3-step procedure
- CLIA waived
- No calibration, no daily controls, and no maintenance
- No refrigeration necessary if used within 3 months
- No capital equipment required
- Enables A1C testing in every exam room

(570-3428) 20/box

PTS Panels®

eGlucose Test Strips

#PTS-2713-HS

(570-0415) 50/box

Contains: 50 test strips.

PTS Panels®

40-µL Capillary Tubes

#PTS-2866-HS

Diagnostics Direct Syphilis Health Check™ ORASURE

Provides results in 10 minutes, enabling patients to learn their status in a single visit. Allows syphilis-positive patients to be connected to care while a lab test is completed for confirmed diagnosis. CLIA-waived for fingerstick whole blood and offers the ability to test in nontraditional testing environments, such as outreach programs and mobile testing clinics. Walk-away procedure allows providers to batch tests, enabling more people to get tested, reducing indirect costs and improving turnaround time. Studies have verified the accuracy at all stages of infection, including latent, which provides the ability to detect infection in pregnant people for identification of potential congenital syphilis at every trimester.

- Ideal for both clinical and nonclinical settings
- Highly accurate: 98.0% sensitivity, 97.2% specificity
- Reads for both IgM and IgG
- Can be easily read in all settings; no need for a reader
- Can be used with people ages 13 years and older

#1001-0698, Syphilis Test Kit

(146-4476)20/box

#1001-0699, Syphilis +/- Control Set

(146-4570)2/box

Note: This test is not intended for use in screening blood or plasma donors.

CPT* Code: 86780QW†

OraQuick® HIV Rapid Test ORASURE

- Rapid human immunodeficiency virus (HIV) types 1 and 2 (antibody test is a single-use, qualitative immunoassay)
- Detects antibodies to HIV
- Only rapid HIV test for use with specimens for oral fluids, venipuncture whole blood, fingerstick whole blood, and plasma
- CLIA waived for specimens for oral fluids, venipuncture whole blood, and fingerstick; whole blood only
- Simple, 2-step, oral-fluid procedure
- Reliable results in just 20 minutes
- Greater than 99% accuracy
- Made in the USA

OraQuick® In-Home HIV Test ORASURE

First FDA-approved, oral swab, in-home test for HIV-1 and HIV-2. Allows the patient to get test results in the privacy of their own home.

- Oral fluid only, no blood required
- Results in 20 minutes
- Privacy of in-home testing; easy disposal with household trash
- Kits can be distributed in person or through the mail
- 99.98% specificity
- 24/7 customer service available

#1001-0374

(145-9364)6/box

Contains: 1 of each: directions, oral swab test stick, tube with solution, information booklets on HIV and testing & package insert.

CPT* Code: 86703QW†

POINT-OF-CARE TESTING

CT/NG TESTING

binx health® io CT/NG Test

BINX HEALTH

Designed for use with the binx health io Instrument, this fully automated, rapid, qualitative test is intended for use in point-of-care or clinical laboratory settings for the detection of *Chlamydia trachomatis* and *Neisseria gonorrhoeae* DNA by polymerase chain reaction. The system delivers central lab-quality results in around 30 minutes for both male and female patients. The rapid turnaround time supports test-and-treat patient care at the time of visit for those who need it and curbs unnecessary empiric treatment for those who don't. Additionally, the binx io CT/NG Assay provides clinics with the ability to make a profit performing the testing in-house while providing superior patient care.

- FDA-cleared and CLIA-waived
- Point-of-care (POC) molecular
- Results in 30 minutes
- Sample collection—Male: first catch urine; Female: vaginal swabs (self- or clinician-collected)
- Single-visit results and treatment
- Easy-to-use platform requires no calibration, preventative maintenance, or interpretation of results, and can be used by non-lab-trained personnel

HIV TESTING

Determine™ HIV-1/2 Ag/Ab Combo

ABBOTT

The first FDA-approved rapid point-of-care test that detects both HIV-1/2 antibodies and free HIV-1 p24 antigen. This 4th-generation test has the ability to identify HIV sooner than conventional rapid tests, which rely solely on the presence of HIV-1/2 antibodies. It enables health care providers to diagnose HIV infection earlier.

- Innovative: It's the first rapid point-of-care test that detects both HIV-1/2 antibodies and free HIV-1 p24 antigen
- Empowering: Enables health care providers to diagnose HIV infection earlier, allowing individuals to seek medical care sooner
- Dependable: Built-in quality controls let you know the test is working
- Efficient: Requires minimal training, test in 3 simple steps, and presents clear results in just 20 minutes
- Flexible: Multiple sample types; fingerstick and venous whole blood, serum, or plasma samples

#7D2648
(512-0022) 25/box

iFOB TESTING

OSOM iFOB Test Kits SEKISUI

Easy-to-use rapid test provides quick, accurate results for detection of fecal occult blood or human hemoglobin for simpler diagnosis of gastrointestinal disorders. The OSOM® iFOB Test is a rapid qualitative test for the immunochemical detection of fecal occult blood/human hemoglobin (hHb) in human fecal specimens as an aid in the diagnosis of gastrointestinal disorders such as diverticulitis, colitis, polyps, and colorectal cancer.

- Aids in prevention—Helps reduce the risk of developing more serious ulcers and other health issues
- Lower healthcare costs—Early diagnosis leads to the reduction of cancer treatment expenses, hospital stays, and long-term care costs
- Improved patient compliance—No dietary or drug restrictions, with an easy-to-use at-home sample collection kit and procedure
- Quick turnaround—Obtain results in 5 to 10 minutes with less than 1 minute of hands-on time
- Trusted results—Highly specific to human hemoglobin with analytical sensitivity of 50 ng hHb/mL buffer or 50 µg hHb/g feces
- QC Inside®—2 extra tests included at no additional charge to run external quality-control testing for more confidence in results

OneStep+ iFOBT Occult Blood Monoclonal Antibody Kits

HENRY SCHEIN®

Innovative dry-base collection method that utilizes 1 sampling card for the collection of 2 fecal specimens, and requires only 1 immunochemical specimen preparation tube/test cassette system for analysis.

- Meets the American Cancer Society and the US Task Force for Colorectal Cancer (CRC) Foundation recommendation of multiple-day testing
- The sampling tab technology replaces unpleasant liquid buffer tubes and eliminates human error due to patient oversampling
- No dietary or drug restrictions
- 30-day stability/24-month shelf life from date of manufacture
- CLIA waived
- Made in the USA

25-Test Complete Kit
(900-4413) 25 tests/kit
Contains: 25 test cassettes, 25 buffer tubes & 25 patient return mailers.

Cassettes
(900-7458) 30/box
Contains: 30 test cassettes & 30 buffer tubes.

20-Patient Mailer Kits
(900-4416) 20/pkg
Contains: 20 postal-approved envelopes, each containing 1 sampling card slide, 2 applicators & patient instructions.

25-Test Complete Kit
CPT® Codes: 82274QW*/G0328QW*

Hemocult® ICT Tests

BECKMAN COULTER

Next-generation fecal occult blood test (FOBT) for colorectal cancer screening. Specific for human hemoglobin, this immunochemical test eliminates all diet and drug restrictions. Specific for lower GI bleeding, resulting in fewer false positives and a reduction in unnecessary invasive procedures.

- CLIA waived; easy test procedure
- Made in the USA
- Screening reimbursement code: G0328QW

#395065A, Collection Card Set (834-7610)	ea
Contains: 100 cards, 100 applicator sticks, physician instructions & sample collection instructions.	
#395066A, Screening Kit (834-3249)	ea
Contains: 1 box of 40 patient screening kits. Each patient screening kit contains: 1 dispensing envelope with patient instructions, 3 Hemocult ICT collection cards, 3 flushable collection tissues, 3 applicator sticks & 1 mailing pouch.	
#395068A, Controls (834-5620)	4/box
#395261A, 2-Day Patient Screening Kit (237-0085)	50/box

Contains: 50 test strips.

POINT-OF-CARE TESTING

iFOB TESTING Cont'd

One Step+ ER Tests

HENRY SCHEIN®

A rapid, convenient, and noninvasive qualitative method for detecting occult blood in the stool. It is intended for professional use as an aid in the diagnosis of asymptomatic gastrointestinal conditions that may manifest themselves by the presence of occult blood in the stool.

- Patented grid design minimizes the number of unreadable slides due to patient oversampling
- Easier to read borderline specimens
- Provides an intense blue reaction, resulting in better readability than traditional guaiac test kits
- 21-day on-slide stability
- 3-year shelf life with room temperature storage
- Familiar patient collection
- Made in the USA

OneStep+ ER Triple Slides Kit

(112-7141) 50/box

Contains: 3 x 10-mL ER Developer and 50 mailing envelopes containing triple slide, 3 applicators & patient instructions.

GUAIAEC TESTING

InSure® ONE™ Fecal Immunochemical Tests (FIT)

ENTERIX

Test provides high sensitivity and ease of use with a simple, water-based collection method designed to be more patient-friendly. The patented brush sampling replaces unpleasant fecal collection or smearing. No dietary or medicinal restrictions, enhanced specificity and sensitivity for more productive colonoscopies. The InSure® ONE™ is based on the immunochemical detection of human hemoglobin (Hb) as an indicator of blood in the stool. The assay uses a monoclonal antibody to capture Hb on a test strip during test development. Since globin does not survive passage through the upper gastrointestinal (GI) tract, the presence of globin in the stool indicates bleeding in the colon or rectum. Clinical studies have demonstrated high sensitivity and specificity of the InSure® ONE™ test in colorectal cancer screening.

- Proven clinical performance
- Reliable and accurate results from a single bowel movement
- Samples toilet water only; no handling of feces
- Patented brush collection method shown to increase patient compliance by 66% in one study*

#90030, Combo Kit **(129-7738)** ea

URINALYSIS

Urispec™ Plus Urinalysis Reader & Urispec™ 11-Way Urine Strip Promotion

HENRY SCHEIN®

Provides dependable urine status results to detect early stages of many diseases, such as diabetes, kidney disease, and urinary tract infections. Instrument-read results have long proven to be advantageous for both busy health care professionals and patients. Comprehensive interface options and the optimized printouts minimize risk associated with manual transcriptions. Reliable results can be obtained virtually immediately at the point of care.

- CLIA-waived
- Readings eliminate subjectivity of visual color interpretation, which makes urinalysis simpler and more reliable
- Features no-touch operation: After strip placement, measurement starts automatically, which makes urinalysis faster and more hygienic
- Easy switch between different test strips: Urispec Plus is for use with Urispec 11-Way, 5-Way Plus, 4-Way, and GP+A urine test strips

(570-1309) ea

Contains: 1 Urispec™ Plus Urinalysis Reader & 12 bottles of Urispec™ 11-Way Urine Strips.

Urispec™ 4-Way Urine Reagent Strips

HENRY SCHEIN®

- Protein, nitrite, glucose, and leukocytes
- Ideal for OB/GYN

Urispec™ Urinalysis Controls

HENRY SCHEIN®

For Most Brands of Routine Urine Dip Sticks and Pregnancy Tests

A bilevel product packaged in plastic tubes and dropper bottles. Controls are liquid, ready-to-use, and are designed to validate urinalysis reagent strips. Packaged in plastic dip tubes and dropper bottles, they are convenient and easy to use. Long open- and closed-vial stability at 2°C–8°C for 2 years unopened, or 90 days once the Dip Control is opened, and 180 days once the Drop Control is opened. This allows the user ample time to utilize the product before expiration, resulting in cost savings.

- Values for all pregnancy test brands
- Assays for common brands of urine dip for routine urinalysis (2 parameter-10SG)
- Includes values for microalbumin, creatinine, and hCG
- Two distinct levels (normal and abnormal)
- Closed-vial dating up to 2 years with refrigerator storage
- 30-day stability at room temperature

3 Bilevel Sets, 15 mL/Tube (6 Vials)

Dip stick in tube, with open-vial stability of 90 days at 2°C–8°C.

(112-6841) ea

2 Bilevel Sets, 25 mL/Dropper Bottle (4 Bottles)
Open-vial stability of 180 days at 2°C–8°C.

(112-6842) ea

FastPack® IP System QUALIGEN

The FastPack® IP System is the only quantitative immunoassay analyzer available that features one-touch operation in delivering values for vitamin D, thyroid stimulating hormone (TSH), free thyroxine (fT4), prostate specific antigen (PSA), testosterone, and human chorionic gonadotropin (hCG). The system is simple, compact, and provides lab-quality performance in 12 minutes or less. The ability to provide real-time test results enables you to diagnose, monitor, and adjust therapy in one patient visit.

- Operating temperature: 59°F–90°F (15°C–32°C)
- Operating humidity: 10% to 80% relative humidity
- Operating altitude: ≤6562 ft
- Pollution degree: 2
- Installation category: II
- Display output: 2-line alphanumeric display
- Data output: RS232, 9600 baud, ASCII text
- Field service options: ROM card firmware upgrade
- Electrical requirements: 100-240 ± 10% VAC, 1.9A
- Power consumption: 100 watts (maximum)
- Size: 13" x 9" x 12"
- Weight: 27 lb
- This product is intended for indoor use only

FastPack® IP Testo Immunoassay QUALIGEN

Testosterone is a steroid hormone that is primarily produced by the testes in males and the ovaries in females. The determination of testosterone levels is crucial in the assessment of hypogonadal states, tumor detection, and in monitoring hormone replacement therapy. The FastPack® IP Testo Immunoassay is a chemiluminescent immunoassay for the in-vitro quantitative determination of total testosterone in human serum and plasma. Designed for use with the FastPack® IP System.

FREND™ System NANOENTEK

Quantitative immunoassay analyzer providing results for vitamin D, TSH, fT4, PSA, and testosterone. The lab-accurate, easy-to-use analyzer provides test results in as little as 1½ to 3 minutes. The FREND occupies bench space smaller than a standard sheet of paper, the smallest of all immunoassay systems.

- The only immunoassay system that is calibrated with an electronic chip, eliminating the need for liquid calibration and test cartridge use
- Liquid controls are required only once every 30 days, when in compliance with IQCP-2016

(455-0011) ea

FREND™ Testosterone Immunoassay Test NANOENTEK

- Measures the level of total testosterone to assess hypogonadal states and monitor hormone replacement of patient
- Used to assist physicians in managing male and female patients with insufficient levels of testosterone
- Fast and accurate results using serum or plasma samples
- Used with the AP System (Automated Processor) for pretreatment of the sample

#FRTE-020
(126-9038) 20/box

FREND™ PSA Plus Immunoassay Test NANOENTEK

- Measures the level of total PSA (prostate-specific antigen) to monitor patients with prostate cancer
- Fast (1½ to 3 minutes) lab-accurate results using serum or plasma samples
- Processes directly in the FREND System

#FRPS-025
(455-0013) 25/box

CPT® Code: 84153†

VITROS® 5600 GUIDELORTHO

Overview:

- Increases capacity with 150 reagent positions that allow over 100 assays to be on-board at once
- Provides greater efficiency, lower maintenance, and minimal calibration by integrating our proven MicroSlide, MicroTip, MicroWell, Intellicheck, and MicroSensor technologies
- Optimizes turnaround time and productivity through innovative Sample-Centered Processing
- Verifies system processing and result reporting while reducing errors

Features:

MicroSensor Technology:

- Reagent-less determination of sample quality indices without additional sample volume or impact on throughput
- Reduces the time, labor, and error potential of manual interpretation

Sample Centered Processing:

- Chemistry and immunoassay sample are processed in parallel
- Eliminates the need to move trays or aliquot samples
- Improves turnaround time and increases efficiency
- Single-use tips for sample and reagent metering
- Eliminates sample and reagent carryover
- Automatically detects clots and bubbles to avoid reporting erroneous results
- e-Connectivity®/Proactive Monitoring
- Highly secure, real-time, 2-way communication between your system and our support teams for timely resolution of technical issues

VITROS® 3600 Immunodiagnostic System GUIDELORTHO

Designing an immunoassay system for laboratories that require accurate, precise, fast, and nonstop testing takes a level of understanding that comes only from first-hand experience. The VITROS® 3600 Immunodiagnostic System represents the study, input, and feedback from a diverse group of laboratories from around the world. Intellicheck® Technology helps ensure the quality of the test result, reduces error potential, and provides real-time operator notification and traceability. MicroSensor Technology—offered for the first time on a standalone immunoassay system—provides reagentless determination of sample quality indices without additional sample volume or impact on throughput. Reduces the time, labor and error potential of manual interpretation.

Product features:

- Productivity of up to 189 tests per hour
- More predictable turnaround times and uninterrupted workflow
- High-quality, high-reportable result efficiency
- A world-class immunoassay menu on a high-productivity platform
- Proven, easy-to-use, self-monitoring VITROS® technologies
- Single-use tips for patient samples and reagents to address carryover and cross-contamination concerns

- Reagent standardization with other VITROS® Systems
- Ability to change reagents, consumables, and waste while operating
- More predictable turnaround times and uninterrupted workflow
- A greener eco-footprint that uses no water and minimizes waste

VITROS® XT 7600 Integrated Chemistry System Analyzer GUIDELORTHO

The next generation of analyzer, the VITROS® XT 7600, is equipped with a new digital reflectometer, is powered by Digital Chemistry™, and features the newly imagined XT MicroSlides.

- Maintains quality and accuracy to deliver the best patient care
- Greater productivity in the same footprint
- Market-leading first pass yield (FPY) of 96.5%
- Reduced patient sample size to 3.8 µL

- Improved interference detection
- Enables XT MicroSlide technology
- Improves our proven proprietary technologies

Access® 2 Immunoassay System BECKMAN COULTER

With an intuitive operator interface, enhanced sample handling, and innovative menu, the state-of-the-art Access 2 system delivers new levels of laboratory efficiency, standardization, and cost effectiveness. A broad menu of high-quality assays from Beckman Coulter and productivity-enhancing features on the Access 2 offer laboratories a flexible option for immunoassay testing. Maximum throughput of 100 tests per hour for one-step assays and 50 tests per hour for two-step assays.

Product features:

- Internal barcode reader automatically identifies reagent packs, decreasing operator loading errors
- Ergonomic workstation provides comfort to all system operators
- User-friendly fluidics tray includes custom consumable slots, improving productivity
- Top-mounted status light-bar notifies operators of instrument status, regardless of where they are in the laboratory
- Remote monitoring capability improves instrument diagnostics
- Magnetic particle separation with chemiluminescent detection technology achieves wide analytical range and fast assay processing
- 24 resident assays with continuous random access and STAT capability
- Onboard refrigeration enhances reagent stability

UniCel® Dxl 600 Access® Immunoassay System BECKMAN COULTER

Why have 50 Reagent spaces on-board?
To provide the flexibility you want.

With up to 50 reagents onboard, the UniCel Dxl 600 Access Immunoassay System enables you have the flexibility to run both routine and specialized tests. The Dxl 600 allows laboratories to decrease process steps and improve turnaround time, with astounding ease of use. Uses the same reagents as other UniCel Access systems, so your laboratory can deliver consistent patient results, no matter which Beckman Coulter immunoassay system performs the test. A broad menu across a wide variety of disease states enables your laboratory to consolidate workstations and recapture testing currently being sent out. Load reagents and all consumables on the fly, without using the console computer or pausing the instrument, minimizing operator intervention. Large onboard capacity of up to 60 samples at once with continuous loading sample racks allow samples to be loaded directly from the centrifuge, reducing manual processes.

Product features:

- Onboard capacity of 50 refrigerated reagent packs enhance flexibility
- Large onboard reagent capacity simplifies reagent management
- Rapid assay kinetics improve turnaround times
- System supports multiple assay protocols
- Magnetic particle separation with enhanced chemiluminescent detection delivers exceptional clinical performance
- Routine sample loading can be interrupted to load STAT samples quickly
- "Point-in-space" pipetting technology aligned with CLSI guidelines allows integration with laboratory automation systems
- Automatically creates aliquots based on the volume of requested tests
- System can be configured to aspirate additional volume required for user-defined reflex or rerun test scenarios
- System stores aliquots for up to 3 hours in a refrigerated, low-evaporation compartment
- Auto-matched pipettors work in parallel to deliver sample and reagent into the reaction vessels
- Achieves a peak throughput of 200 tests per hour

Immolute® 2000 XPI Immunoassay System SIEMENS HEALTHINEERS

This highly reliable system is easy to use and has one of the largest automated immunoassay menus available. Medium- to high-volume laboratories can incorporate specialty and allergy testing into routine workloads to improve productivity and efficiency.

Enhanced laboratory workflow:

- Maximum throughput of 200 tests per hour
- Rerun, dilution, and reflex capabilities minimize technologist's time
- Auto-start functionality—including automated daily maintenance and quality control scheduling—reduces hands-on operations
- Flexible solutions:
 - Cost-effective automation available by connecting to VersaCell® solutions
 - Scalable connectivity to Siemens track-based automation solutions
- Improved efficiency:
 - Intuitive, easy-to-use software
 - 19" touch screen monitor for easy navigation
 - Color-coded consumable levels always available at a glance
 - User configurable dilution and reflex testing to meet laboratory needs

Atellica® Solution Immunoassay and Clinical Chemistry Analyzers SIEMENS HEALTHINEERS

The Atellica Solution is designed to address common clinical laboratory challenges. It integrates immunoassay and clinical chemistry analyzers with the new standard in sample-management technology so the user can focus on driving better outcomes. These flexible, scalable, automation-ready immunoassay and clinical chemistry analyzers feature patented bidirectional magnetic sample-transport technology, the flexibility to create over 300 customizable configurations, and a broad assay menu with proven detection technologies.

- Atellica CH 930 Analyzer—Clinical chemistry analyzer that runs up to 1800 tests per hour
- Photometric: 1200 tests per hour
- Integrated multisensor technology (IMT): 600 tests per hour
- Onboard capacity: 70 assays (67 reagent positions and 3 IMTs)
- Sample management via Atellica Sample Handler or Atellica Direct Load
- Up to 6 Atellica CH 930 Analyzers can be connected to accommodate chemistry testing volume
- Atellica IM 1300 Analyzer—Up to 220 tests per hour*
- Proven acridinium ester (AE) technology
- 42 primary assay positions, 35 ancillary reagent positions
- Sample management via Atellica Sample Handler or Atellica Direct Load
- Up to 3 Atellica IM analyzers can be connected to the Atellica Sample Handler to accommodate immunoassay testing volume

Tosoh AIA®-360 Automated Immunoassay Analyzer **TOSOH MEDICS, INC**

The AIA-360's size and affordability make it an excellent fit for POLs and small hospitals, as well as for specialty testing or for use as a backup analyzer.

Features:

- Throughput of 36 results per hour
- STAT assay results in ~20 minutes
- Up to 300 assay results can be saved on the AIA-360
- Random access
- Bar-coded primary tube sampling
- Full test menu of short time (ST) assays
- Fits multiple laboratory environments: Small hospitals-Physician office laboratories-Cardiac and specialty testing-Reliable backup to larger Tosoh analyzers

TROCAR SUPPLIES AND KITS

CONVENIENT AND SAFE.

Introducing *NEW* Trocar
Standard Kits for Hormone
Replacement Therapy!

WRAP KITS

Wrap kits are organized
by their sequence of use
and are cost-effective.

Stocked with: fenestrated drape, alcohol prep pad,
luer lock syringe, needle, scalpel, forceps, tape-strips,
gauze dressings, medium or large gloves, chlorhexidine or
betadine, kits with CHG include tegaderm and medicine cup

Wrapped Kits					
Female Item Number	4.5mm Male Counterpart	Trocar Material	Insertion Depth	Glove Size	Sterilization Agent

Safety Hypodermic Needles and Syringes

From a Name You Can Trust.

Features & Benefits:

- 3 single-handed safety activation methods: hard-surface, thumb, or finger
- Double-locking mechanism with an audible “click”
- Needle hub-compatible with all standard Luer lock and Luer slip-tip syringes
- ISO color coded—easy and quick identification of the needle gauge
- Bevel-up needle—allows for low-angle injections
