# Helping to Keep Patients Safe and Ensuring Employees are Compliant and Productive

Today's healthcare facilities are renewing commitments to hygiene and efficiency, and strengthening their businesses long term. And they're trusting GP PRO solutions and a robust supply chain to help keep them ahead of trends. **Several key improvements are helping facilities protect and empower patients and workers—and build loyalty long term ...**

## Heightened Hand Hygiene and Compliance

Especially now, a fresh approach to hand hygiene can help protect patients and employees. A critical step is increasing access to soaps, sanitizers and paper towels—in touchless dispensers.

## Moving to Touchless Technology

Automated, closed-system dispensers are engineered for hygiene, efficiency and aesthetics—enhancing your medical staff areas, exam rooms, labs, restrooms, and break areas.

## Rethinking Your Public Restrooms

Upgrading restrooms with touchless automation and high-capacity dispensers can help elevate hygiene, improve the experience, and minimize service interactions.

## Sustainable Selections and Waste Reduction

More healthcare facilities are insisting on sustainable products. And when coupled with controlled, one-at-a-time dispensing, they can also help reduce waste.

## Disposables for Break Areas and Cafes

It's no wonder more healthcare facilities are adopting Dixie® disposable cups, plates, napkins and cutlery as convenient, hygienic alternatives to permanent-ware dishes and silverware.
