## 626 Barrier-Free® Examination Chair MIDMARK

Many health-care providers are not aware of current standards for proper blood-pressure measurement. If this isn't addressed, it leaves health systems at serious risk. 9.8% of the population is affected by overestimation of high blood-pressure errors. Multiply the cost of treatment for hypertension by the typical patient panel size and the cost of overtreatment could be as much as \$135,000 per each practicing physician. The impact of overmedication can also result in complications such as dizziness, fainting, exhaustion, or even patient falls. The Midmark 626 is the first exam chair of its kind designed to promote proper patient positioning for a more accurate blood-pressure measurement.

- Easily position patients for a better BP measurement
- Powered movement of the back section ensures the patient's back is supported
- A Barrier-Free® low chair-height allows the majority of patients, even female patients with heights in the 3rd percentile, to place their feet flat on the floor

## Ritter 225 Barrier-Free® Examination Chair MIDMARK

The number of elderly and obese in the U.S. is steadily growing, and over one fifth of adults in America are disabled. Assisting patients with mobility limitations onto exam chairs has become a frequently performed task. Although caregivers working in health-care facilities are in one of the most at-risk professions for musculoskeletal disorders, little has been done to evaluate and reduce risk. The Ritter 225 is designed to offer low and high positioning heights so you can provide the best care to all patients, whether treating the elderly, expectant mothers, or patients with disabilities.

## AED Plus® Defibrillator

### ZOLL

Can deliver a potentially lifesaving shock to the heart if needed, and can guide rescuers to perform high-quality CPR with the integrated Real CPR Help® technology that provides real-time feedback for both rate and depth of chest compressions. It offers easy-to-understand audio and visual prompts and uses a 1-piece electrode pad for fast and easy placement. The 5-year pad and battery life mean fewer replacements and the lowest total cost of ownership. 7-year warranty.

# MAKE EVERY MINUTE COUNT IN YOUR COMMUNITY

Point-of-care (POC) testing is ideal for community health and federal clinics because it keeps patients out of hospitals, while saving money and improving community health clinic metrics.

*“These 2 instruments have strengthened our clinic by allowing us to run the A1c and cholesterol testing on-site. This has been a valuable resource to our patients because it saves them from making a trip to an off-site location.”*

**ALBERT VASQUEZ**

Executive Director, Raphael Community Free Clinic

**73% of US patients with diabetes** are not meeting targets for glycemic, blood pressure, or cholesterol control<sup>1</sup>

**Less than 7% are tested** at the guideline-recommended frequency for HbA1c<sup>2</sup>

Patients who follow these guidelines are over 5 times more likely to **achieve a recommended HbA1c <7%**<sup>2</sup>

# POINT OF CARE TESTING

## Afinion 2 Analyzer ABBOTT

With its compact size and panel of tests, the Afinion 2 system is ideal for point-of-care testing in physician offices, clinics, community health centers, and hospital outpatient clinics. From just a small urine or fingerstick whole-blood sample, lab-accurate results for ACR and HbA1c are made available during the consultation. With built-in connectivity, the Afinion 2 Analyzer can communicate with LIS and HIS systems to share and manage data more effectively, contributing to better patient management everywhere.

- Size: 7.2" x 7.5" x 13"
- Weight: 7½ lb
- Patient/operator ID and patient/control results stored in memory
- No maintenance required
- No operator calibration
- Extensive and comprehensive failsafe systems prevent the possibility of erroneous results
- QC and operator lockout
- Afinion tests can be used with both the Afinion 2 Analyzer and the Alere Afinion AS100 Analyzer

## Cholestech LDX™ System ABBOTT

Complete Lipid Profile, Glucose and ALT Lab-accurate lipid profile and glucose results in about 5 minutes from a simple fingerstick. Allows provider to get results while patient is still in office—provider can counsel and intervene face-to-face. This improves patient compliance and increases control and management of heart disease and diabetes. Reimbursable by Medicare and most private payers.

- CLIA waived
- Procedure saves time and enhances productivity
- Small, tough, and portable
- Eliminates anxiety of venipuncture: requires only a fingerstick
- On-the-spot adjustment of therapy and patient compliance
- Accuracy comparable to laboratory tests
- Saves time: fewer follow-up visits required
- Enhances compliance through teachable moments between health care providers and patients

We make  
diagnostics that

matter

We understand it is crucial to immediately diagnose and treat vulvovaginal disorders which are linked to a broad range of associated health complications, from preterm birth to an increase in Sexually Transmitted Infections.<sup>1</sup>

The OSOM® BVBLUE® and OSOM® Trichomonas Tests are easy-to-use, CLIA-waived and produce accurate and objective results for two of the most common causes of vulvovaginal disorders so you can get the answers fast and your patients back to doing what they love.

Like you, we understand there is a patient behind every answer—and that's what matters most.

## Syphilis Testing

### Diagnostics Direct Syphilis Health Check™ ORASURE

Provides results in 10 minutes, enabling patients to learn their status in a single visit. Allows syphilis-positive patients to be connected to care while a lab test is completed for confirmed diagnosis. CLIA-waived for fingerstick whole blood and offers the ability to test in nontraditional testing environments, such as outreach programs and mobile testing clinics. Walk-away procedure allows providers to batch tests, enabling more people to get tested, reducing indirect costs and improving turnaround time. Studies have verified the accuracy at all stages of infection, including latent, which provides the ability to detect infection in pregnant people for identification of potential congenital syphilis at every trimester.

- Ideal for both clinical and nonclinical settings
- Highly accurate: 98.0% sensitivity, 97.2% specificity
- Reads for both IgM and IgG
- Can be easily read in all settings; no need for a reader
- Can be used with people ages 13 years and older

# Faster Results, Better Care

## Same-visit Chlamydia and Gonorrhea Test & Treatment.

Persisting rates of chlamydia and gonorrhea (CT/NG) infections remain a significant concern in the public health space. But results can take days to complete<sup>1</sup>. This puts providers in a difficult position: empirically treat or risk delaying care.

With the binx *io*, CT/NG test results are made available in minutes rather than days. A true test & treat model for chlamydia and gonorrhea can decrease the the risk of empiric treatment, loss to follow-up and further infection spread.<sup>2,3</sup>

The binx *io* device is the first FDA (510k), CLIA-waived, molecular PCR CT/NG test for males and females in about 30 minutes enabling clinics to deliver central lab equivalent test accuracy, in-house.

Let binx health support you provide better quality care in an affordable way that puts your providers and patients first.

## POINT OF CARE TESTING

### binx health® *io* CT/NG Test

#### BINX HEALTH

Designed for use with the binx health *io* Instrument, this fully automated, rapid, qualitative test is intended for use in point-of-care or clinical laboratory settings for the detection of *Chlamydia trachomatis* and *Neisseria gonorrhoeae* DNA by polymerase chain reaction. The system delivers central lab-quality results in around 30 minutes for both male and female patients. The rapid turnaround time supports test-and-treat patient care at the time of visit for those who need it and curbs unnecessary empiric treatment for those who don't. Additionally, the binx *io* CT/NG Assay provides clinics with the ability to make a profit performing the testing in-house while providing superior patient care.

- FDA-cleared and CLIA-waived
- Point-of-care (POC) molecular
- Results in 30 minutes
- Sample collection—Male: first catch urine; Female: vaginal swabs (self- or clinician-collected)
- Single-visit results and treatment
- Easy-to-use platform requires no calibration, preventative maintenance, or interpretation of results, and can be used by non-lab-trained personnel

## TOPICAL SKIN ADHESIVE – OCTYL

High-Strength 2-Octyl Cyanacrylate Formulation

### Advantages

Rapid set time

Flexibility without a plasticizer

Ergonomic ampule designed for ease of handling and targeted application

Provides an effective microbial barrier and water-resistant protection

High tensile strength

Unique formulation will not solidify in ampule, allowing all .5 ml to be used

Gravity fed applicator delivery system - no need to squeeze ampule

Glass-free reservoir containing 0.5mL of Topical Skin Adhesive

Rigid sleeve helps prevent bending of applicator during adhesive application

Angled applicator tip changes color in the presence of adhesive

Perforation in the middle, allowing ease of adhesive flow

### Additional Information

Polymerization starts when adhesive comes in contact with tissue or fluid.

All 0.5 ml of adhesive can be used on the patient, as adhesive will not solidify in the ampule.

Topical Skin Adhesive will remain attached to the skin surface until natural cellular regeneration occurs (approx. 5-7 days). If needed, any standard adhesive remover product may be used to release the adhesive from the skin. Peel off the film, do not pull the skin apart.

## Composi-Tight® 3D Fusion™ Sectional Matrix System

### GARRISON DENTAL SOLUTIONS

Same great features as the 3D XR™ but with the added benefit of 3D Fusion™ Bands and 3D Fusion™ Wedges. Full curve, nonstick bands wrap further around the tooth, making ring placement easier. Both the Soft-Face™ 3D-Ring and the 3D XR™ ring adapt to the contours of the tooth to nearly eliminate flash. The 3D XR™ ring grabs the teeth to eliminate “spring-off” and is ideal for small, malpositioned teeth or between canines and premolars.

Starter Kit with Rally™ Polishers

(300-0384)..... Ea.

Contains: 3 rings (short, tall & wide), 70—3D Fusion™ Bands (20 of each: 4.4mm, 5.6mm & 6.6mm; & 5 of each: 6.0mm with extension & 8.7mm with extension), 80—3D Fusion™ Wedges (20 of each size: X-small, small, medium & large), 4 FenderWedges™ (1 of each: 1.0mm, 1.4mm, 1.9mm & 2.3mm), 12 Rally™ Polishers (2 of each: coarse point, coarse cup, medium point, medium cup, fine point & fine cup) & 1—3D Fusion™ Ring Placement Forceps.

## Vanish™ 5% Sodium Fluoride White Varnish with Tri-Calcium Phosphate SOLVENTUM, FORMERLY 3M HEALTH CARE

White varnish, enhanced with tricalcium phosphate, becomes virtually invisible after application. Saliva-activated formula adheres to dry or moist teeth and will spread after application due to the patented formula, which allows migration to tooth surfaces. Indicated to treat hypersensitive teeth, exposed dentin, and root-surface sensitivity.

By participation in such program, you agree that, to your knowledge, your practice complies with the program requirements. For HS promotions: This promotion offers a bundled discount. The cost of any "buy/get" (or "no charge") items is a discount applied to your other purchases on the same invoice. The reportable value (unit price) of the "no charge" item will be identified on the invoice. To calculate the applicable discount on the other items on the same invoice, divide the total value (unit price(s)) of any no-charge item(s) by the total value (extension price(s)) of all other items purchased on the same invoice, and apply the resulting percentage equally to each item to determine net prices. For manufacturer promotions: The prices stated in the invoice or statement may reflect a discount or be subject to a rebate. You must fully and accurately report this stated discount price, or if applicable, any net pricing, after giving effect to any rebates, to Medicare, Medicaid, Tricare and any other federal or state program upon request by any such program. Accordingly, you should retain these records. It is your responsibility to review any agreements or other documents applicable to these prices to determine if they are subject to a rebate.
